"Fantastical, thoughtful, and un-put-downable, I flew through Stormsong and want the third in the series NOW." —Elizabeth Hoyt After spinning an enthralling world in Witchmark, the winner of the World Fantasy Award for best novel that was praised as a "can't-miss debut" by Booklist, and as "thoroughly charming and deftly paced" by the New York Times, C. L. Polk continues the Kingston Cycle in Stormsong. Magical cabals, otherworldly avengers, and impossible love affairs conspire to create a book that refuses to be put down. Dame Grace Hensley helped her brother Miles undo the atrocity that stained her nation, but now she has to deal with the consequences. With the power out in the dead of winter and an uncontrollable sequence of winter storms on the horizon, Aeland faces disaster. Grace has the vision to guide her parents to safety, but a hostile queen and a ring of rogue mages stand in the way of her plans. There's revolution in the air, and any spark could light the powder. What's worse, upstart photojournalist Avia Jessup draws ever closer to secrets that could topple the nation, and closer to Grace's heart. Can Aeland be saved without bloodshed? Or will Kingston die in flames, and Grace along with it? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Nghi Vo's Hugo and Crawford Award-winning series, *The Singing Hills Cycle*, continues... "A remarkable accomplishment of storytelling."—NPR on *The Empress of Salt and Fortune* Wandering cleric Chih of the Singing Hills travels to the riverlands to record tales of the notorious near-immortal martial artists who haunt the region. On the road to Betony Docks, they fall in with a pair of young women far from home, and an older couple who are more than they seem. As Chih runs headlong into an ancient feud, they find themselves far more entangled in the history of the riverlands than they ever expected to be. Accompanied by Almost Brilliant, a talking bird with an indelible memory, Chih confronts old legends and new dangers alike as they learn that every story—beautiful, ugly, kind, or cruel—bears more than one face. *The Singing Hills Cycle* *The Empress of Salt and Fortune* *When the Tiger Came Down the Mountain* *Into the Riverlands* The novellas of *The Singing Hills Cycle* are linked by the cleric Chih, but may be read in any order, with each story serving as an entry point. While a number of gases are implicated in global warming, carbon dioxide is the most important contributor, and in one sense the entire phenomena can be seen as a human-induced perturbation of the carbon cycle. *The Global Carbon Cycle* offers a scientific assessment of the state of current knowledge of the carbon cycle by the world's leading scientists sponsored by SCOPE and the Global Carbon Project, and other international partners. It gives an introductory over-view of the carbon cycle, with multidisciplinary contributions covering biological, physical, and social science aspects. Included are 29 chapters covering topics including: an assessment of carbon-climate-human interactions; a portfolio of carbon management options; spatial and temporal distribution of sources and sinks of carbon dioxide; socio-economic driving forces of emissions scenarios. Throughout, contributors emphasize that all parts of the carbon cycle are interrelated, and only by developing a framework that considers the full set of feedbacks will we be able to achieve a thorough understanding and develop effective management strategies. *The Global Carbon Cycle* edited by Christopher B. Field and Michael R. Raupach is part of the Rapid Assessment Publication series produced by the Scientific Committee on Problems of the Environment (SCOPE), in an effort to quickly disseminate the collective knowledge of the world's leading experts on topics of pressing

environmental concern.

An eagerly awaited collection of stories dealing with domestic abuse, edited by the New York Times bestselling author Zane. *Breaking the Cycle* is a stunning and moving anthology of stories, each of which focuses on an aspect of domestic abuse. This powerful collection is sure to serve as a wake-up call for people either dealing with a domestic abuse situation, or those watching someone else endure it. In the title story, Zane describes the turmoil that a young girl suffers at the hands of her stepfather. The girl and her mother plan their escape, but at the last minute the mother falters. In D.V. Bernard's "The Lonely Echoes of My Youth," readers are introduced to a young boy raising himself on the fringes of a drug-infested neighborhood. Nane Quartay's provocative story, "The Grindstone," describes a boy who witnesses a brutal murder which will have far-reaching effects on him and his family. Tracy Price-Thompson weaves a powerful tale in "The Stranger" when a woman constantly abused by her husband finds inner strength after a brutal attack. Collen Dixon's "The Break of Dawn" will keep readers deep in thought long after they finish reading her story about a young desperate mother terrified that her own daughter will grow up and become victimized herself. Dywane D. Birch's "Victory Begins With Me" reflects how one woman has to struggle to get her life back to normal. Shonda Cheekes' "Silent Suffering" flips the script when a man finds himself abused by the female in his life. Newcomer J.L. Woodson's "God Does Answer Prayers" deals with a young boy fighting for his life in a hospital bed, put there by one of the people who is supposed to love him the most: a parent. These stories capture the dangerous realities of domestic abuse, while also pointing toward the steps that need to be taken to break the cycle that perpetuates it. It is sure to serve as a rallying cry for all those who desire victory over their own victimization, and a guide for understanding the complex undercurrents that make such patterns possible.

One-size-fits-all cluster policies have been rightly criticized in the literature. One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development (emergence, growth, sustainment or decline) their cluster is in. In this highly insightful book, these stage-specific cluster policies are analysed and evaluated. Moreover, several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries. In so doing, the book contributes to a newly emerging literature on how the cluster life cycle concept can inform policies and how these policies differ from static approaches that ignore the dynamism of clusters. The underlying idea is to foster the ability of clusters to renew themselves and to generate new developmental paths, thus preventing stagnation and decline. This state-of-the-art exploration of smart specialization from a cluster life cycle perspective is an invaluable book for academics in the fields of economic geography, entrepreneurship, innovation, industrial economics, regional studies and cluster research. It will also appeal to regional policy makers and practitioners dealing with public policy. Contributors include: Y. Al-Saleh, B.T. Asheim, A. Auer, M. Benner, P. Cooke, D. Fornahl, J.K. Fosse, M. "Fireborne is everything I want in fantasy."--Rachel Hartman, *New York Times* bestselling author of *Seraphina* *Game of Thrones* meets *Red Rising* in a debut young adult fantasy that's full of rivalry, romance . . . and dragons. Annie and Lee were just children when a brutal revolution changed their world, giving everyone—even the lowborn—a chance to test into the governing class of dragonriders. Now they are both rising stars in the new regime, despite backgrounds that couldn't be more different. Annie's lowborn family was executed by dragonfire, while Lee's aristocratic family was murdered by revolutionaries. Growing up in the same orphanage forged their friendship, and seven years of training have made them rivals for the top position in the dragonriding fleet. But everything changes when survivors from the old regime surface, bent on reclaiming the city. With war on the horizon and his relationship with Annie changing fast, Lee must choose to kill the only family he has left or to betray everything he's come to believe in. And Annie must decide whether to protect the boy she loves . . . or step up to be the champion her city needs. From debut author Rosaria Munda comes a gripping adventure that calls into question which matters most: the family you were born into, or the one you've chosen.

Anne Walker shows that women are neither the victims of raging hormonal fluctuations nor entirely unaffected by them. Unlike most previous publications that focus on menstruation (a part of the cycle), *The Menstrual Cycle* presents a well researched study of the entire menstrual cycle and its relationship to women's lives. Women's own experiences in different cultures are contrasted with medical textbook descriptions and the "normal" is found to be rather elusive. This book will be read by discourse analysts, doctors, nurses and any woman who has felt curious about her menstrual cycle and its possible effects.

Nitrogen is an essential element for plant growth and development and a key agricultural input-but in excess it can lead to a host of problems for human and ecological health. Across the globe, distribution of fertilizer nitrogen is very uneven, with some areas subject to nitrogen pollution and others suffering from reduced soil fertility, diminished crop production, and other consequences of inadequate supply. *Agriculture and the Nitrogen Cycle* provides a global assessment of the role of nitrogen fertilizer in the nitrogen cycle. The focus of the book is regional, emphasizing the need to maintain food and fiber production while minimizing environmental impacts where fertilizer is abundant, and the need to enhance fertilizer utilization in systems where nitrogen is limited. The book is derived from a workshop held by the Scientific Committee on Problems of the Environment (SCOPE) in Kampala, Uganda, that brought together the world's leading scientists to examine and discuss the nitrogen cycle and related problems. It contains an overview chapter that summarizes the group's findings, four chapters on cross-cutting issues, and thirteen background chapters. The book offers a unique synthesis and provides an up-to-date, broad perspective on the issues of nitrogen fertilizer in food production and the interaction of nitrogen and the environment.
