Auswahl von Illustrationen des 16. bis 19. Jahrhunderts.

The Art of Natural History Lund Humphries Publishers Limited
This magnificent compendium is the fourth in a series of catalogues describing selections of rare books and other material in the Oak Spring Garden Library, a collection assembled by Mrs. Rachel "Bunny" Lambert Mellon. Herbaria describes sixty-three books and manuscripts about herbs and includes exquisite

illustrations selected from the works themselves. Spanning the fourteenth to nineteenth centuries, and featuring works by Brunfels, Culpeper, Monardes, and Linnaeus, among others, this authoritative catalogue will prove fascinating to botanists, bibliophiles, garden historians, and herbalists alike.

The Flowering of the Landscape Garden Oak Knoll Press

"Pennyroyal. All-heal. Love-in-a-mist. Ragged robin. Viper's bugloss. These plants, whose very names conjure up a bygone world, were among the great variety of flowers and herbs grown in America's colonial and early Federal gardens. This sumptuously illustrated book brings this botanical heritage back to life."

"Drawing on years of archival research and field trials, Colonial Williamsburg curator of plants Lawrence Griffith documents fifty-

eight species of flowers and herbs and explores how they were cultivated and used." "Barbara Lombardi's glorious photographs capture the delicacy and strength of the flowers and herbs. Elegant period hand-colored engravings, watercolors, and woodcuts provide provocative visual counterparts to the modern photography." "This book is a dazzling treat for armchair gardeners and for those who have visited and admired the famous gardens in Colonial Williamsburg's Historic Area. It is also an important contribution to our understanding of colonial and Federal plants and an invaluable companion for today's gardeners, who will appreciate the advice of a master gardener on how to plan, choose appropriate species, and maintain a beautiful period garden."--BOOK JACKET.

From the golden age in English history to today's gardeners and designers, this volume recognizes women's contributions to gardening in Britain and around the worldspanning more than four centuries. Despite growing vegetables for their kitchens, tending herbs for their medicine cupboards, and teaching other women about the craft before agricultural schools officially existed, women have been mere footnotes in the horticultural annals for specimens collected abroad. These pioneers influence on the style of gardens in the present day is illustrated here in a style both accessible and scholarly. Presenting a rare bouquet, this collection shares the stories of more than 200 women who have been involved with garden design, plant collecting, flower arranging, botanical art, garden writing, and education."

This is the latest volume in a major series that describes selections of the rare books, manuscripts, and other works of art held at Oak Spring Garden Library, a collection formed by Rachel Lambert Mellon. The 111 items chosen for this volume on floral illustration since the later Middle Ages include Books of Hours, still-life and vanitas paintings, botanical prints, and books of instruction of every kind, from planting a garden to making flowers using colored papers or wax. Lucia Tongiorgi Tomasi groups the works into chapters on such topics as florilegia, women artists, tulipomania, Dutch and Flemish painting, and exotic flowers from distant lands, providing an introduction to each chapter that gives the contextual background necessary for a real understanding and appreciation of floral illustration past and present. The sheer beauty as well as extraordinary skills encountered, for example, in manuscript florilegia by Jacob Marrel and Maria Sibylla Merian, in hand-colored books by Jacques Le Moyne de Morgues and G.B. Ferrari, and in flower studies painted by John Constable, Margaret Mee, and others, are testament to the high status accorded floral illustration over the centuries. This handsome, richly illustrated volume will attract all those with an interest in rare books and the history of art as well as horticulturalists, botanists, and garden historians.

Library Journal Yale University Press

Among the most admired and rarest works ever created are the large-scale books of natural history. The detailed drawings and

the remarkable color reproductions found in these magnificent editions truly astounded the art and book worlds. *Great Natural History Books and Their Creators* reveals the incredible stories behind these exceptional collector's books. Ray Desmond engagingly shares with the reader the dramatic behind-the-scene story of how these rare volumes were created. He conveys the hardships and sacrifices by the early artists whose works are forever preserved in these beautiful volumes. This edition contains over 115 illustrations (69 in full color plates), which were carefully reproduced from the original plate pages at The British Library and other prominent archives.

We've all seen red roses, blue irises, and yellow daffodils. But when we really look closely at a flower, whole new worlds of beauty and intricacy emerge. Using a unique process that far surpasses conventional macro photography, Robert Llewellyn shows us details that few of us have ever seen: the amazing architecture of stamens and pistils; the subtle shadings on a petal; the secret recesses of nectar tubes. Complementing

Llewellyn's stunning photographs are Teri Dunn Chace's lyrical, illuminating essays. By highlighting the features that distinguish twenty-eight of the most common families of flowering plants, Chace gives us fascinating insights into the natural history of flowers, such as the relationship between pollinators and floral form and color. At the same time she gives us a deeper appreciation of why and how flowers have become so deeply embedded in human culture. Whether you're a nature lover, a gardener, a photography buff, or someone who simply responds to the timeless beauty and variety of the floral world, *Seeing Flowers* will be a source of enduring delight.

An Oak Spring Pomona is the second in a series of catalogues describing selections of rare books and other material in the Oak Spring Garden Library, a collection formed by Mrs. Paul Mellon. The Pomona describes one hundred books and manuscripts about fruit, with illustrations taken from some of the most beautiful books on the subject as well as from original drawings and paintings. The earliest book described is Bussatos Giardino di Agricoltura of 1592, the latest The Herefordshire Pomona, an encyclopedia of apples and pears from the 1870s. In between

there are fruit books large and small: La Quintinie's Instruction pour les Jardins fruitiers, Duhamel's Traite des arbres fruitiers, and many others. The book is divided into sections on fruit-growing in France and Britain, fruit elsewhere in Europe, and fruit in America, as well as citrus fruit, apples and pears, peaches and soft fruit, grapes, melons, and tropical fruit. Each description gives the background of the book and its relationship to others and is accompanied by illustrations of its contents in color and black and white. The Pomona includes not only brief bibliographical summaries of each book but also background wssays that place the books in a historical setting.

Introduction to the Plant-life of the Oxford District

"The emergence of natural science in the early modern period has been linked to the history of books, but this relationship is generally discussed in terms of texts. In contrast, the eleven essays in this volume consider the role of images and their relationship to text in the production and transmission of knowledge."--P. [4] of cover.
