Gather around parents and monster bedtime book fans! It is time for another instant nursery rhymes classic! Meet Marty, a young imaginative boy and a very adorable monster named Momo. And they are here to make your bedtime routine F-U-N! Marty and Momo Make Bedtime Fun starts with a young child named Marty living with his parents. One beautiful night while getting ready for bed, Marty began hearing some strange scratching noises. Frightened and confused, Marty called Mommy for comfort. The noises kept coming proving that Marty wasn't just imagining things. Mommy and Daddy knew they had to do investigate but couldn't find anything. Still, Marty is a very imaginative person and enjoys the bedtime stories Mommy reads every night. But this was a very different night for Marty as he heard the noises once again as soon as he started playing a game by himself. "A voice in the darkness said, "Marty, hello!" This voice sounded weird and it was very low... " It was a monster! The monster's two green horns and purple furry outlandish look didn't help relieve Marty's fears until it started to smile and talk. When Marty started to overcome his fears and say something, the monster got scared too. But then something amazing happened. He started to talk and he even has a name - Momo. Momo has a problem of his own and it involves getting ready for his bedtime routine. Marty placed his fear of monsters behind him and helped Momo by sharing the entertaining side of bedtime. Even Mommy got in on the whole thing and read a beautiful sleep book to put both Marty and Momo to bed. The next morning to Marty's surprise, Momo was gone with only a note left behind. Momo's note expressed happiness in meeting a new friend along with a strong desire to return the following week. While waiting for that day to come, Momo wasted no time in teaching all of the things he learned from Marty to his monster family. Marty and Momo Make Bedtime Fun is all about embracing all the nice things of going to bed. It might be tricky and a little scary to do on your own but you'd be surprised with the folks willing to help you. Marty most

Regreso al Futuro, Avatar, Indiana Jones, Jurassic World, Star Wars, Matrix, El Caballero Oscuro, Guerra Mundial Z o el universo Marvel son películas que se han convertido en grandes éxitos de taquilla que hacen las delicias de todos los aficionados al cine. Pero, más allá de que son entretenidas y te hacen pasar un buen rato, ocultan fallos estrepitosos e incoherencias que muchas veces se pasan por alto y que dejarían a cualquiera ojoplático. Con humor, ironía y muchas risas, Andoni Garrido, autor del conocido canal de Youtube Agujeros de guion, zambulle al lector en los famosos agujeros de guion de las sagas más conocidas de los últimos años, poniendo el acento sobre las contradicciones en la trama y sus personajes, en las coincidencias escandalosas o en situaciones inverosímiles. ¿Preparados para volver a ver vuestras pelis favoritas con otra perspectiva?

"THE ULTIMATE DINOSAUR BIOGRAPHY," hails *Scientific American*: A thrilling new history of the age of dinosaurs, from one of our finest young scientists. "A masterpiece of science writing."—Washington Post A New York Times Bestseller • Goodreads Choice Awards Winner • A BEST BOOK OF THE YEAR: Smithsonian, Science Friday, The Times (London), Popular Mechanics, Science News "This is scientific storytelling at its most visceral, striding with the beasts through their Triassic dawn, Jurassic dominance, and abrupt demise in the Cretaceous." —Nature The dinosaurs. Sixty-six million years ago, the Earth's most fearsome creatures vanished. Today they remain one of our planet's great mysteries. Now *The Rise and Fall of the Dinosaurs* reveals their extraordinary, 200-million-year-long story as never before. In this captivating narrative (enlivened with more than seventy original illustrations and photographs), Steve Brusatte, a young American paleontologist who has emerged as one of the foremost stars of the field—naming fifteen new species and leading groundbreaking scientific studies and fieldwork—masterfully tells the complete, surprising, and new history of the dinosaurs, drawing on cutting-edge science to dramatically bring to life their lost world and illuminate their enigmatic origins, spectacular flourishing, astonishing diversity, cataclysmic extinction, and startling living legacy. Captivating and revelatory, *The Rise and Fall of the Dinosaurs* is a book for the ages. Brusatte traces the evolution of dinosaurs from their inauspicious start as small shadow dwellers—themselves the beneficiaries of a mass extinction caused by volcanic eruptions at the beginning of the Triassic period—into the dominant array of species every wide-eyed child memorizes today, T. rex, Triceratops, Brontosaurus, and more. This gifted scientist and writer re-creates the dinosaurs' peak during the Jurassic and Cretaceous, when thousands of species thrived, and winged and feathered dinosaurs, the prehistoric ancestors of modern birds, emerged. The story continues to the end of the Cretaceous period, when a giant asteroid or comet struck the planet and nearly every dinosaur species (but not all) died out, in the most extraordinary extinction event in earth's history, one full of lessons for today as we confront a "sixth extinction." Brusatte also recalls compelling stories from his globe-trotting expeditions during one of the most exciting eras in dinosaur research—which he calls "a new golden age of discovery"—and offers thrilling

accounts of some of the remarkable findings he and his colleagues have made, including primitive human-sized tyrannosaurs; monstrous carnivores even larger than T. rex; and paradigm-shifting feathered raptors from China. An electrifying scientific history that unearths the dinosaurs' epic saga, *The Rise and Fall of the Dinosaurs* will be a definitive and treasured account for decades to come. Includes 75 images, world maps of the prehistoric earth, and a dinosaur family tree.

From his stunning discovery of *Tyrannosaurus rex* one hundred years ago to the dozens of other important new dinosaur species he found, Barnum Brown led a remarkable life (1873–1963), spending most of it searching for fossils—and sometimes oil—in every corner of the globe. One of the most famous scientists in the world during the middle of the twentieth century, Brown—who lived fast, dressed to the nines, gambled, drank, smoked, and was known as a ladies' man—became as legendary as the dinosaurs he uncovered. Barnum Brown brushes off the loose sediment to reveal the man behind the legend. Drawing on Brown's field correspondence and unpublished notes, and on the writings of his daughter and his two wives, it discloses for the first time details about his life and travels—from his youth on the western frontier to his spying for the U.S. government under cover of his expeditions. This absorbing biography also takes full measure of Brown's extensive scientific accomplishments, making it the definitive account of the life and times of a singular man and a superlative fossil hunter.
