This book is the first comprehensive post-war history of one of Europe's most vibrant cities throughout an extraordinary period of social, cultural and economic change. The capital of Italy's economic miracle of the 1950s and 60s, Milan was a magnet for immigrants, as industry, design and culture created a heady mix of wealth, innovation and conflict. By the 1980s, heavy industry had all but disappeared and the city had reinvented itself as the world capital of fashion and a dynamic post-industrial metropolis. Meanwhile, the urban landscape was darkened by the bleak estates of the peripheries and the corruption scandals that exploded in what became known as 'Tangentopoli', or Bribesville. This fascinating book traces Milan's 'biography' through its buildings, design, fashion, cinema,

families, immigrants and television. The city emerges as a potent economic power-house and laboratory for change, where art and culture converge in a modern but problematic urban space. Anyone interested in Italian history, urban studies or the future of Europe's cities will find this book an essential read.

The Pantheon is one of the most important architectural monuments of all time. Thought to have been built by Emperor Hadrian in approximately AD 125 on the site of an earlier, Agrippan-era monument, it brilliantly displays the spatial pyrotechnics emblematic of Roman architecture and engineering. The Pantheon gives an up-to-

date account of recent research on the best preserved building in the corpus of ancient Roman architecture from the time of its construction to the twenty-first century. Each chapter addresses a specific fundamental issue or period pertaining to the building; together, the essays in this volume shed light on all aspects of the Pantheon's creation, and establish the importance of the history of the building to an understanding of its ancient fabric and heritage, its present state, and its special role in the survival and evolution of ancient architecture in modern Rome.
