Computerworld Open Road Media In Point Taken, Ross Guberman delves into the work of the best judicial opinion-writers and offers a step-by-step method based on practical

and provocative examples. Featuring numerous cases and opinions from 34 esteemed judges - from Learned Hand to Antonin Scalia - Point Taken, explores what it takes to turn "great judicial writing" into "great writing". Guberman provides a system for crafting effective and efficient openings to set the stage, covering the pros and cons of whether to resolve legal issues up front

and whether to sacrifice taut syllogistic openings in the name of richness and nuance. Guberman offers strategies for pruning clutter, adding background, emphasizing key points, adopting a narrative voice, and guiding the reader through visual cues. The structure and flow of the legal analysis is targeted through a host of techniques for organizing the discussion at the macro level, using

headings, marshaling authorities, including or avoiding footnotes, and finessing transitions. Guberman shares his style "Must Haves", a bounty of edits at the word and sentence level that add punch and interest, and that make opinions more vivid, varied, confident, and enjoyable. He also outlines his style "Nice to Haves", metaphors, similes, examples, analogies, allusions, and

rhetorical figures. Finally, he addresses the thorny problem of dissents, extracting the best practices for dissents based on facts, doctrine, or policy. The appendix provides a helpful checklist of practice pointers along with biographies of the 34 featured judges. **Truthiness Fever** Cambridge University Press In its 114th year, Billboard

coaching writers who struggled with procrastination issues, high sensitivity to criticism, and crippling self doubt, Lauren Sapala realized that almost every one of her clients was an INFJ or INFP. Using the insights gleaned from these clients, as well as her own personal story, Sapala shows us how the experience of the intuitive writer can be radically different from the norm. INFJ writers don't think like

anyone else, and their highly creative brains take a toll on them that they rarely share with the outside world. The INFJ Writer discusses such topics as: How an INFJ writer's physical health is tied to their creative output Why INFJ writers are more likely to fall prey to addictions When an INFJ writer should use their natural psychic ability to do their best creative

work Whether looking to start writing again or to finish the novel/memoir they started so long ago, any writer with the self-awareness to identify themselves as highly sensitive and intuitive will benefit from this book that helps them to find their own magic, and to finally use it to build the creative life that actually works for them.

Proceedings of the International

Congress of Education of the World's Columbian Exposition, Chicago, July 25-28, 1893 University of Toronto Press As fast-paced as a freefall from a roaring airplane, as thrilling as a towering jump off a ski slope, Being Extreme is a fascinating examination of the adrenaline rush of extreme sports. Here is a world where living life on the edge is the only option, where you are only as good as

your last jump . . . and where one false move can take you out of the game permanently. From mountain climbing and freestyle motocross to skydiving and snowboarding and beyond, in the past decade, the world of extreme sports has exploded onto the scene, with daredevils attempting acts of athleticism that leave spectators awed . . . and fearful. Being Extreme

explores the motivations and societal impulses behind these high-risk lifestyles through interviews with professional athletes and recreational enthusiasts, as well as with psychiatrists who seek to understand the motivation behind these “Big T” personalities. Authors Gutman and Frederick also explore what heart-stopping sports are around the next curve, because in a world where

the “rush” is everything, everyone is always upping their game.

This volume presents a cross-section of current research on the internal syntax of ‘Determiner Phrases’ (DPs), with special emphasis on the analysis of DPs modified by genitival, adjectival and other non-finite attributes. Possessors, Predicates and Movement in the DP

illustrates clearly the ongoing debate over older and more recent approaches to the syntax of DPs in particular in the wake of the minimalist program (Chomsky 1995) and Kayne’s antisymmetry hypothesis (Kayne 1994). The relative theoretical coherence among the contributions permits detailed comparison of specific syntactic proposals, providing a solid basis for

further debate. Several of the papers address the syntactic questions in parallel with related semantic or morphological issues. The value of this collection to the study of Universal Grammar is also underlined by its comparative bias. Analyses of Germanic, Romance and Balkan languages figure prominently, and a number of new empirical generalizations

within and between languages are discussed. **Visual Style and Constructing Identity in the Hellenistic World** John Benjamins Publishing For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. According to conventional wisdom, Italy was not an influential participant in the nationalistic and imperialistic discourses that world's fairs produced in countries such as Great Britain, France, and the United States. In the late nineteenth

and early twentieth centuries, however, Italy hosted numerous national and international exhibitions expounding notions of national identity, imperial expansion, technological progress, and capitalist growth.

World's Fairs Italian-Style explores world's fairs in Italy at the turn of the twentieth century in comparison to their more famous counterparts in France,

England, and the United States.

Cristina Della Coletta demonstrates that, because of its social fragmentation and hybrid history, Italy was a site of both hegemony and subordination – an aspiring imperial power whose colonization started from within. She focuses on two best-selling authors, Emilio Salgari and Guido Gozzano, and illustrates how these authors interpreted

their age's 'exposition mentality.' Salgari and Gozzano's exposition narratives, Della Coletta argues, reveal Italy's uncertainties about own sense of national identity, and its belated commitment to Western imperialism. Of interest to students and scholars of literature, cultural history, and Italian, *World's Fairs Italian-Style* provides a fascinating glimpse into a hitherto

unexplored area of study, and brings to light a cultural phenomenon that played a significant role in shaping Italy's national identity. *PC Mag* FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for

generations. **World's Fairs Italian-Style** This book should crystallize your cynicism. You, your friends, your children already discount most of the information you hear or read that is presented as fact. You have come to believe that nearly everyone is lying, governments and businesses use giant megaphones for propaganda, and that only a fool would

expect the media to be constrained to truth telling. Are your perceptions correct, and has it always been this bad?

Located in the small kingdom of

Commagene at the upper Euphrates, the late Hellenistic monument of Nemrud Dağ (c.50 BC) has been

undeservedly neglected by scholars.

Qualified as a Greco-Persian hybrid instigated by a lunatic king, this

fascinating project of bricolage has been written out of history.

This volume

redresses that imbalance, interpreting Nemrud Dağ as an attempt at canon

building by Antiochos I in order to

construct a dynastic ideology and social order, and proving the monument's importance for our

understanding of a crucial transitional phase from Hellenistic to Roman.

Hellenistic Commagene therefore

holds a profound significance for a number of discussions,

such as the functioning of the Hellenistic koine and the genesis of Roman 'art', Hellenism and Persianism in antiquity, dynastic propaganda and the power of images, Romanisation in the East, the contextualising of the Augustan cultural revolution, and the role of Greek culture in the Roman world.
