Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! "Iceberg, Right Ahead!" Only 160 minutes passed between the time a sailor on lookout duty uttered these chilling words and the moment when the mighty ocean liner Titanic totally disappeared into the cold, dark waters of the North Atlantic. This century-old tragedy, which took more than 1,500 lives, still captivates people in the twenty-first century. Seventy-three years separate the two major Titanic events—the 1912 sinking of the vessel and the dramatic 1985

discovery of the wreck by Robert Ballard. But additional stories about the victims, survivors, rescuers, reporters, investigators, and many others show the far-reaching effects this tragedy had on society. Award-winning author Stephanie Sammartino McPherson has collected numerous personal accounts of the event, including the knighted man who spent the rest of his life in seclusion because he was accused of dishonorable behavior in a lifeboat, the stewardess who survived two shipwrecks and a mid-ocean collision, and the New York Times executive who sent multiple reporters to meet the rescue ship, thus earning a national reputation for his newspaper. She also links the Titanic tragedy to changes in regulations worldwide. After a Senate Inquiry and a British trial attempted to assign blame for the disaster, new laws on ship safety were put in place. A group of nations also banded together to form an ice patrol, eventually leading to the formation of the U.S. Coast Guard. Even the most avid Titanic fans will learn something new as McPherson brings the reader up to date on the politics and intrigue still surrounding the wreck—including what modern science can reveal about what really happened to the ship and who was at fault. Prepare to follow the never-ending story of the Titanic into its second century.

Castles National Geographic Children's Books

Thomas Jefferson, the third president of the United States, was a man of contradictions. Jefferson penned the most stirring claim of the Declaration of Independence: "all men are created equal." Yet during his lifetime, Jefferson owned hundreds of enslaved African Americans. An adamant

believer in limited government, Jefferson nevertheless acted without constitutional power to buy land from France—the Louisiana Purchase—that doubled the size of the United States. Jefferson died on the Fourth of July, 1826, exactly fifty years after the signing of the Declaration of Independence. Despite his contradictions, Jefferson's words continue to express the noble ideals of Americans—freedom from tyranny and equality for all.
