**The Planetarium** Harvard University Press  
 Beginning with 1953, entries for Motion pictures and filmstrips, Music and phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955.

**The Book Buyer's Guide** HarperCollins UK  
 Here is the captivating story of humankind's enduring quest to build a better language—and overcome the curse of Babel. Just about everyone has heard of Esperanto, which was nothing less than one man's attempt to bring about world peace by means of linguistic solidarity. And every Star Trek fan knows about Klingon. But few people have heard of Babm, Blissymbolics, Loglan (not to be confused with Lojban), and the nearly nine hundred other invented languages that represent the hard work, high hopes, and full-blown delusions of so many misguided souls over the centuries. With intelligence and humor, Arika Okrent has written a truly original and enlightening book for all word freaks, grammar geeks, and plain old language lovers.

**Dictionary Catalog of the Music Collection** Random House  
 Miller's groundbreaking first novel, banned in Britain for almost thirty years.

**Giornale della libreria, della tipografia, e delle arti e industrie affini** World Bank Publications  
 "The many narratives of The Planetarium, told from various points of view, revolve around a seemingly simple conceit: a young man has his heart and ambition set on his aunt's large apartment. But, as in Sarraute's other books, this plot forms only the surface of what is really happening. Instead, Sarraute focuses on the emotional lives and internal thoughts of her characters in a way that goes beyond what Virginia Woolf did years before. The spite the young man feels toward his mother-in-law for offering him and his wife cheap chairs for their apartment; the terror inspired during a confrontation between the same young man and his aunt; and the need for approval he feels when he's around his Gertrude Stein-like literary icon are some of the many internal conflicts that move the narrative forward through the minds of the conflicted and clashing characters. Always deeply engaging, The Planetarium uses a simple plot to reveal the disparity between the way we see ourselves and the way others see us."-- Publisher's website.

Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall "ease of doing business", and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new "distance to frontier" measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The Doing Business report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist

 In this thoroughly innovative work, Hans Ulrich Gumbrecht evokes the year 1926 through explorations of such things as bars, boxing, movie palaces, hunger artists, airplanes, hair gel, bullfighting, film stardom and dance crazes. From the vantage

points of Berlin, Buenos Aires, and New York, the reader is allowed multiple itineraries, ultimately becoming immersed in the activities, entertainments, and thought patterns of the citizens of 1926.

**Le Figaro Magazine** Cambridge University Press  
 This book offers perspectives on the legal and intellectual developments of the twelfth century. Gratian's collection of Church law, the Decretum, was a key text in these developments. Compiled in around 1140, it remained a fundamental work throughout and beyond the Middle Ages. Until now, the many mysteries surrounding the creation of the Decretum have remained unsolved, thereby hampering exploration of the jurisprudential renaissance of the twelfth century. Professor Winroth has now discovered the original version of the Decretum, which has long lain unnoticed among medieval manuscripts, in a version about half as long as the final text. It is also different from the final version in many respects - for example, with regard to the use of Roman law sources - enabling a reconsideration of the resurgence of law in the twelfth century.

**Epoca** Dalkey Archive Press  
 Eighth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2011 measures regulations affecting 10 areas of everyday business activity: starting a business, dealing with construction permits, employing workers, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts, and closing a business. The report updates all 10 sets of indicators, ranks countries on their overall ease of doing business and analyzes reforms to business regulation- identifying which countries are improving strengthening their business environment the most and which ones slipped. Doing Business 2011 includes results on the ongoing research in the area of "getting electricity" and illustrates how reforms in business regulations can translate into better outcomes for domestic entrepreneurs and the wider economy. It also focuses on how women in particular are affected by complex business regulations.

 Karl Corino, dessen Musil-Bildband vor Jahren von der Kritik gefeiert wurde, legt nun ein weiteres Ergebnis seiner jahrzehntelangen Recherchen vor: eine fundamentale, bahnbrechende Biographie des großen österreichischen Autors.  
**Doing Business 2011**  
 Analyses by author, title and key word of books published in Italy.  
**In 1926**  
 Marking a complete break with previous scholarship in the field, this book rewrites the history of early Chan (Zen) Buddhism, focusing on the genealogy and doctrine of one of its dominant strains, the so-called Northern school that flourished at the turn of

the eighth century. The traditional interpretation of the Northern school was heavily influenced by the polemics of one of its opponents, the monk Shenhiu, who characterized the Northern school's teaching as propounding the belief that enlightenment occurred gradually, was measurable, and could be expressed in conventional language. To all this, Shenhiu and his teaching of "sudden enlightenment" were opposed, and Shenhiu's school and its version of history would later prevail. On the basis of documents found at Dunhuang, this book shows how the traditional view is incorrect, that Shenhiu's imposition of a debate between gradual and sudden conceals the doctrinal continuity between the two schools and the diversity of Chan thought in the period. The author buttresses his conclusions by placing the evolution of early Chan in the intellectual, political, social, and economic context of the mid-Tang. The book is in three parts. The

first part treats the biography and thought of the "founder" of the Northern school, Shenxiu, the nature of his followers, and his affinities for Buddhist scholasticism. The second part studies the way in which the Northern school, after Shenxiu, adapted to new circumstances: changes in imperial policies, the rise of rival schools, and changes in the nature of its followers. The third part focuses on the internecine struggles around the genealogy of Chan as reflected in the *Lengqie shizi ji* (Record of the Masters and Disciples of the Lankavatara [School]) by the monk Jingjue. A close reading of this work reveals that it foreshadowed many of the themes and issues that would later come to the forefront in Zen, and contributes significantly to our reassessment of the teachings and practices of "pre-classical" Chan.
