"Modern Gauguin studies—complex interpretations of the works based on the identification of the artist's sources in ancient sacred art from around the world—began in the early 1950s with the pioneering research of Bernard Dorival and Henri Dorra. The Symbolism of Paul Gauguin: Erotica, Exotica, and the Great Dilemmas of Humanity, Dorra's ultimate meditation on the art of Gauguin, constitutes a milestone in the history of Post-Impressionism."—Charles Stuckey is an independent scholar and consultant

Historical and theoretical analysis of the “clear line” style in comics and cinema The “clear line”, a term coined in 1977 by Dutch essayist and artist Joost Swarte, has become shorthand in the field of comics studies for the style originally developed by Hergé and the École de Bruxelles. It refers to certain storytelling strategies that generate a deceptively simple, lucid, and hygienic narration: in Philippe Marion’s words, it is a style “made out of light, fluidity and limpid clarity”. By cataloguing and critically analysing clear line comics from historical and theoretical perspectives, this book offers a new outlook on the development of the style in the 20th and 21st centuries, especially focused on the context of the European bande dessinée. In addition, it pioneeringly expands the concept of “clear line” to other artistic domains by introducing and defending its transmedial use, which is particularly relevant for the understanding of the oeuvres of certain filmmakers of the 20th century working in the postwar period, such as Yasujiro Ozu in Japan, Jacques Tati in France and Frank Tashlin in the United States. The Clear Line in Comics and Cinema is therefore a key

theoretical work for both bande dessinée enthusiasts and comics scholars, as well as a fundamental contribution to present-day film studies and transmedial narratology.

À l'aube de ce récit, la généreuse ambition de Tintin semble démesurée. Il s'engage à démanteler le trafic d'opium international qui sévit dans un pays mythique certes, mais dont il ignore tout, la Chine. Aidé par la seule société secrète, Les Fils du Dragon, et par son ami Tchang, rencontré tardivement, il parvient à surmonter tous les obstacles et ruiner les perfides machinations de ses nombreux ennemis.

Les aventures de Tintin reporter en Extrême-orient (le lotus bleu) Oxford University Press, USA In English-speaking countries, Francophone comic strips like Hergés's Les Aventures de Tin Tin and Goscinny and Uderzo's Les Aventures d'Asterix are viewed—and marketed—as children's literature. But in Belgium and France, their respective countries of origin, such strips—known as bandes dessinées—are considered a genuine art form, or, more specifically, "the ninth art." But what accounts for the drastic difference in the way such comics are received? In *Masters of the Ninth Art*, Matthew Screech explores that difference in the reception and reputation of bandes dessinées. Along with in-depth looks at Tin Tin and Asterix, Screech considers other major comics artists such as Jacque Tardi, Jean Giraud, and Moebius, assessing in the process their role in Francophone literary and artistic culture. Illustrated with images from the artists discussed, *Masters of the Ninth Art* will appeal to students of European popular culture, literature, and graphic art.

This volume uniquely gathers scholarly articles dealing with very dissimilar and kaleidoscopic perspectives on India. It provides an informative overview of the country, which has wide-ranging influences reaching far from India itself, since it has criss-crossed connections with many countries around the world. If read as a collection, this volume is witness to an interlocking network of ideas, attitudes and ideologies that emerge from the contemporary social and political world. The book, thus, highlights a variety of issues and the chapters promise to treat them with adequate justice. These features mean that this book can be approached by any person interested in India, given that it offers a diverse range of interesting topics related to the country. The reader glancing through the book will find themes spanning from the analysis of postcolonial literature written in

English by Indian women, to sociological reflections on several diasporic situations, and from crossed influences between Indian culture and that of other countries, to the latest discussion topics in ancient Indian history, to mention a few.

Comment Hergé a créé "Le lotus bleu" Liverpool University Press

The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological, most prominently theological and phenomenological ideas: first through the establishment of comparative, philological and sociological methods and secondly through the demand for intentional neutrality. This interpretation caused important roots in occult-esoteric traditions to be repressed. This process of "purification" (Latour) is not to be equated with the origin of the academic studies. De facto, the elimination of idealistic theories took time and only happened later. One example concerning the early entanglement is Tibetology, where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society. Similarly, the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance, which hold that all religions have a common origin. In this perspective, it is not only the history of religious studies which must be revisited, but also the partial shaping of religious studies by these traditions, insofar as it saw itself as a counter-model to occult ideas.

Do Irish superheroes actually sound Irish? Why are Gary Larson's Far Side cartoons funny? How do political cartoonists in India, Turkey, and the US get their point across? What is the impact of English on comics written in other languages? These questions and many more are answered in this volume, which brings together the two fields of comics research and linguistics to produce groundbreaking scholarship. With an international cast of contributors, the book offers novel insights into the role of language in comics, graphic novels, and single-panel cartoons, analyzing the intersections between the visual and the verbal. Contributions examine the relationship between cognitive linguistics and visual elements as well as interrogate the controversial claim about the status of comics as a language. The book argues that comics tell us a great deal about the sociocultural realities of language, exploring what code switching, language contact, dialect, and linguistic variation can tell us about identity - from the imagined and stereotyped to the

political and real.

The Blue Lotus

The Theosophical Society (est. 1875 in New York by H. P. Blavatsky, H. S. Olcott and others) is increasingly becoming recognized for its influential role in shaping the alternative new religious and cultural landscape of the late nineteenth and the twentieth century, especially as an early promoter of interest in Indian and Tibetan religions and philosophies. Despite this increasing awareness, many of the central questions relating to the early Theosophical Society and the East remain largely unexplored. This book is the first scholarly anthology dedicated to this topic. It offers many new details about the study of Theosophy in the history of modern religions and Western esotericism. The essays in *Imagining the East* explore how Theosophists during the formative period understood the East and those of its people with whom they came into contact. The authors examine the relationship of the theosophical approach with orientalism and aspects of the history of ideas, politics, and culture at large and discuss how these esoteric or theosophical representations mirrored conditions and values current in nineteenth-century mainstream intellectual culture. The essays also look at how the early Theosophical Society's imagining of the East differed from mainstream 'orientalism' and how the Theosophical Society's mission in India was distinct from that of British colonialism and Christian missionaries.
