Winfried Baumgart's masterful history of the Crimean War has been expanded and fully updated to reflect advances made in the field since the book's first publication. It convincingly argues that if the war had continued after 1856, the First World War would have taken place 60 years earlier, but that fighting ultimately ceased because diplomacy never lost its control over the use of

war as an instrument in power politics. With 19 images, 13 maps and additional tables as well as a brand new chapters on 'the medical services', this expanded and fully-updated 2nd edition explores * The origins and diplomacy of the Crimean War * The war aims and general attitudes of the belligerent powers (Russia, France, and Britain), non-belligerent German powers (Austria and Prussia) and a selected number of neutral powers, including the United States * The characteristics and capabilities of the armies involved * The nature of the fighting itself The Crimean War: 1853-1856 examines the conflict in both its Europe-wide and global contexts, moving beyond the five great European powers to consider the role and importance of smaller states and theatres of war that have otherwise been under-served. To this end, it looks at fighting on the Danube front, the Black Sea, the

Baltic Sea, the Caucasian battlefield, as well as the White Sea and the Pacific, with final chapters devoted to the Paris peace congress of 1856, the end of the war and its legacy. This book remains the definitive study of one of the most important wars in modern history.

This book is a brief introduction to the Kurdish language spoken in Iraq and Iran. It contains dialogs, vocabularies, simple grammatical explanations, and exercises. The Kurdish text is written in Latini, the Romanized version of Sorani, but in most cases the Kurdo-Arabic version of the sentences is also given for the use of a Kurdish tutor or teacher. This book is only an introduction to the language. Its vocabulary of more than 400 words is a basis upon which to build. Kurdish grammar, especially the verb system, is complicated. What is given here is a foundation of simple, useful constructions.

What is a narrative? What is narrative fiction? How does it differ from other kinds of narrative? What features turn a discourse into a narrative text? Now widely acknowledged as one of the most significant volumes in its field, *Narrative Fiction* turns its attention to these and other questions. In contrast to many other studies, *Narrative Fiction* is organized around issues - such as events, time, focalization, characterization, narration, the text and its reading - rather than individual theorists or approaches. Within this structure, Shlomith Rimmon-Kenan addresses key approaches to narrative fiction, including New Criticism, formalism, structuralism and phenomenology, but also offers views of the modifications to these theories. While presenting an

analysis of the system governing all fictional narratives, whether in the form of novel, short story or narrative poem, she also suggests how individual narratives can be studied against the background of this general system. A broad range of literary examples illustrate key aspects of the study. This edition is brought fully up-to-date with an invaluable new chapter, reflecting on recent developments in narratology. Readers are also directed to key recent works in the field. These additions to a classic text ensure that *Narrative Fiction* will remain the ideal starting point for anyone new to narrative theory.

Germany in the 20th century endured two world wars, a failed democracy, Hitler's dictatorship, the Holocaust, and a country divided for 40 years after World War II. But it has also boasted a strong welfare state, affluence, liberalization and globalization, a successful democracy, and the longest period of peace in European history. A History of Twentieth-Century Germany provides a survey of German history during a century of extremes. Ulrich Herbert sees German history in the 20th century as determined by two contradictory perspectives. On one hand, there are the world wars and great catastrophes that divide the country's history into two parts-before and after 1945. Germany is the birthplace of radical ideologies of the left and right and the only country in which each ideology became the foundation of government. This pattern left its stamp on both the first and second halves of the century. On the other hand, the rise of modern industrial society led to decades of conflict over the social and political order regardless of which political system was in force. Considering these contradictory developments, Herbert tackles the questions of both the collapse in the first half of the century and the development from a post-fascist, ruined society to one of the most stable liberal democracies in the world in the latter half. Herbert's analysis brings together wars and terror, utopia and politics, capitalism and the welfare state, socialism and liberal democratic society, gender and generations, culture and lifestyles, European integration and globalization. The resulting book sets a standard by which historians of the period

will be measured in the future.

The North-South divide in Europe represents a geographical and cultural boundary that has influenced how European nations think about their history and identity. This study explores German representations of the South by examining the Italian travel writings of Goethe and Heine to reveal the changing meaning of Italy for German cultural identity.

Ferhenga Biruski is the go-to dictionary for Kurmanji a dialect of Kurdish spoken originally in parts of Iran, Iraq, Syria, Turkey while also being common among a large diaspora of Kurds in Europe, North America and elsewhere. This comprehensive Kurmanji-English dictionary is prepared in two volumes by Michael L. Chyet, a renowned linguist with extensive knowledge of the major dialects of Kurdish. This dictionary is an essential reference source for linguists and others interested in Kurdish language and people. "The second edition of my Kurmanji-English dictionary, which I would like to call "Ferhenga Birûskî" to honor the memory of my beloved friend and colleague Birûsk Tugan, contains considerably more entries, and in many cases offers fuller information on earlier entries. In addition, I have found and corrected several typographical errors. Moreover, it is to be accompanied by a companion English to Kurdish volume. [...] It is my goal to accurately reflect the language as it exists today, providing variant spellings, synonyms, and regional usage, as well as etymologies. The late Iranist D.N. MacKenzie advised me early on to avoid filling my dictionary with "ghost words". He suggested that I base all the entries in my dictionary on texts (both written and orally generated), to ensure that I am reflecting the language as it is used by its speakers. The earlier dictionaries include words of unknown provenance, which may have no existence outside those pages." - Excerpt from the Introduction

The German lacuna in Edward Said's 'Orientalism' has produced varied studies of German cultural and academic Orientalisms. So far the domains of German politics and scholarship have not been conflated to probe the central power/knowledge nexus of Said's argument. Seeking to fill this gap, the diplomatic career and scholarly-literary productions of the centrally placed Friedrich Rosen serve as a focal point to investigate how politics influenced knowledge generated about the "Orient" and charts the roles knowledge played in political decision-making regarding extra-European regions. This is pursued through analyses of Germans in British imperialist contexts, cultures of lowly diplomatic encounters in Middle Eastern cities, Persian poetry in translation, prestigious Orientalist congresses in northern climes, leveraging knowledge in high-stakes diplomatic encounters, and the making of Germany's Islam policy up to the Great War. Politics drew on bodies of knowledge and could promote or hinder scholarship. Yet, scholars never systemically followed empire in its tracks but sought their own paths to cognition. On their own terms or influenced by "Oriental" savants they aligned with politics or challenged claims to conquest and rule.

This collection of the works of ancient Arabic poets encompasses

the original three volumes of the collection by Ahlwardt from 1902 and 1903. The substantial introductions and comments are in German while the works referenced appear in the original Arabic. The three volumes contain material from al Asma lyyat of al Asmai, al Ajjah, az Zafayan, and Ruba ben al Ajjaj, poets of the pre-Islamic period. This title, bound into one volume for affordability, is increasingly difficult to acquire. The selections of the poems themselves are essential reading for any historian of Arabic poetry while the comments of the editor add interpretive value to the original material from the hands of the poets themselves.
