"A unique account of the rise of the Berber cultural identity, in particular of the Kabyles of Algeria, in modern times.

Luminaries such as Amrouche, Feraoun, Matoub, and Farès are impressively brought back to life."--

Abdourahman A. Waberi, author of *Passage of Tears* "An insightful and important addition to the field of postcolonial French studies, tracing

the development of Berber consciousness in the 1930s to the events of the 'Arab Spring.'"--Patricia Geesey, University of North Florida "A sensitive account of the paradoxical effects of colonialism and its aftermath on the formerly colonized. It is a must-read for anthropologists, literary scholars, and historians of the period."--Vincent Crapanzano, author of *The Harkis* "An intimate and forceful inquiry into the Berber cultural movement and the conditions of postcoloniality more generally.

Incorporating literature and music, history and politics, *We Are Imazighen* brings the cultural life of the Kabyle people to an English-speaking

audience with grace and passion."--David Crawford, author of Moroccan Households in the World Economy "Provides a framework for analyzing literary and oral material rooted in Berber culture and expressing an alternative way of conceptualizing identity."--Mildred Mortimer, author of Writing from the Hearth To the world they are known as Berbers, but they prefer to call themselves Imazighen, or "free people." The claim to this unique cultural identity has been felt most acutely in Algeria in the Kabylia region, where an Amazigh consciousness gradually emerged after WWII. By tracing the cultural production of the Kabyle people--

their songs, oral traditions, and literature--from the early 1930s through the end of the twentieth century, Fazia Aïtel shows how they have defined their own culture over time. Ultimately, she argues that the Amazigh literary tradition is founded on dual priorities: the desire to foster a genuine dialogue while retaining a unique culture.

### **Analyzing the Global Political Economy**

MacMillan

Ideally suited to upper-undergraduate and graduate students, *Analyzing the Global Political Economy* critically assesses the convergence between IPE, comparative political economy, and economics. Andrew Walter and Gautam

Sen show that a careful engagement with economics is essential for understanding both contemporary IPE and for analyzing the global political economy. The authors also argue that the deployment of more advanced economic theories should not detract from the continuing importance for IPE of key concepts from political science and international relations. IPE students with little or no background in economics will therefore find this book useful, and economics students interested in political economy will be alerted to the comparative strengths of political science and other social science disciplines. A concise look at the foundations of analysis in the political economy of

global trade, money, finance, and investment Suitable for upper-undergraduate and graduate students with some or no economic background Techniques and findings from a range of academic disciplines, including international relations, political science, economics, sociology, and history Further reading and useful weblinks including a range of relevant data sources, listed in each chapter

This volume of collected essays explores the premise that Plutarch's work, notwithstanding its amazing thematic multifariousness, constantly pivots on certain ideological pillars which secure its unity and coherence. So, unlike other similar books which, more or less, concentrate on either the Lives or the Moralia or on some particular aspect(s) of

Plutarch's œuvre, the articles of the present volume observe Plutarch at work in both Lives and Moralia, thus bringing forward and illustrating the inner unity of his varied literary production. The subject-matter of the volume is uncommonly wide-ranging and the studies collected here inquire into many important issues of Plutarchean scholarship: the conditions under which Plutarch's writings were separated into two distinct corpora, his methods of work and the various authorial techniques employed, the interplay between Lives and Moralia, Plutarch and politics, Plutarch and philosophy, literary aspects of Plutarch's

œuvre, Plutarch on women, Plutarch in his epistemological and socio-historical context. In sum, this book brings Plutarchean scholarship to date by revisiting and discussing older and recent problematization concerning Plutarch, in an attempt to further illuminate his personality and work. The Professional Value of ERASMUS Mobility Springer Nature This book represents a first considered attempt to study the factors that conditioned industrial chemistry for war in 1914-18. Taking a comparative perspective, it reflects on the experience of France, Germany, Austria, Russia, Britain, Italy and Russia, and

points to significant similarities and differences. It looks at changing patterns in the organisation of industry, and at the emerging symbiosis between science, industry and the military.

Find your signature voice People are drawn to and influenced by leaders who communicate authentically, connect easily with people, and have immediate impact. So how do you become one of them? How can you learn to “own the room”? This book will help you develop your leadership presence. According to Amy Jen Su and Muriel Maignan Wilkins, leadership presence is the ability

to consistently and clearly articulate your value proposition while influencing and connecting with others. They offer a simple and compelling framework, as well as practical advice about how you can develop your own personal presence. No matter where you sit in an organization, you can “own the room” if you are able to do two things well: first, demonstrate your authentic value and distinction, and second, connect to others in a positive way. Leaders who are able to be authentic while connecting with and impacting others have what the authors call a “signature voice”—a means of self-expression that is uniquely and distinctly their own. Once you discover and express

your own signature voice, you’ll be ready to take your leadership presence to the next level. Filled with real-life stories and examples, *Own the Room* demystifies the concept of presence and gives you the tools you need to identify and embrace your unique leadership voice—and have a greater impact on the world around you. *Boundary Spanning Leadership: Six Practices for Solving Problems, Driving Innovation, and Transforming Organizations* Harvard Business Press This publication contains guidance on developing a methodological framework for social cohesion indicators which can be applied at local, regional,

national and European levels, covering the conceptual approach used and its practical application. It sets out the results of the main applications and trials carried out in 2003 and 2004 and how they tie in with devising a framework of action.

The last Asian financial crisis, coupled with the western series of corporate scandals, has caused investors and citizens to doubt managers' ability to guarantee credible financial information about organizations. Consequently, legislators all over the world have come to realise the necessity of legislating in the area of corporate governance. This book explores several national corporate governance reform experiences from around the world (including Canada, China, the United States, and the European Union) and offers an explanatory theory with regard to national systems of corporate governance.

It also underlines corporate governance as a management tool and principle. The author argues that each country should be encouraged to build its own system of corporate governance which should be harmonized with its history, culture and the level of its economic development.

Introducing Human Rights is a primer for understanding what human rights are, why we require them, and why their violation threatens our basic existence as human beings. Based on the requirement of the B.A. (Foundation) Course in Human Rights, Gender and Environment, the book is divided into 15 thematic chapters including: Definitions

and Classifications of Human Rights, Human Rights and the Constitution of India, India and International Monitoring Bodies, The Human Rights Movements in India, The Criminal Procedure Code, Consumer Rights and Violence against Women, Environmental Law The chapters highlight the relevance of these issues in Indian and international law and the basic legal framework within which human rights operate. Comprehensive in coverage and essential for classroom learning and analysis, the volume also teaches students about: What to do when human rights are violated, Mechanisms of redress and their use.

The 2020 edition of the WWDR, titled *Water and Climate Change* illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses – in terms of adaptation, mitigation and improved resilience – that can be undertaken by enhancing water resources management,

attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the

goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

### **Global Perspectives on Sustainable Forest Management** BRILL

The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents.

Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature

across linguistic and cultural barriers.

Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation.

Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across

linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Applying a trans-disciplinary approach, this book provides a comprehensive, research-based guide to understanding, implementing, and strengthening sustainable community health in diverse international settings. By examining the interdependence of environmental, economic, public health, community wellbeing and development factors, the authors address the systemic factors impacting health disparities, inequality and social justice issues. The book analyzes strategies based on a partnership view of health, in which communities determine their health and wellness working alongside local, state and federal health

agencies. Crucially, it demonstrates that communities are themselves health systems and their wellbeing capabilities affect the health of individuals and the collective alike. It identifies health indicators and tools that communities and policy makers can utilize to sustain truly inclusive health systems. This book offers a unique resource for researchers and practitioners working across psychology, mental health, rehabilitation, public health, epidemiology, social policy, healthcare and allied health.

What are European archaeologists doing

abroad? What have they been doing there for the past three to four centuries? Are they doing things differently nowadays? To address these questions, this book explores the scope, impact and ethics of European archaeological policies and practices in the Mediterranean area, the Near East, sub-Saharan Africa, Asia and Latin America. Acknowledging that international and transcultural projects have a range of different stakeholders, the first part of this book aims to identify some of the values and motivations behind different European archaeologies abroad. This is done by providing thorough historical overviews on a range of European

countries, including France, Spain, Germany, Belgium, the Netherlands and Poland. But how are these values translated, through socio-political, theoretical and administrative frameworks, unto local circumstances in host countries? And how are these archaeological activities received locally? The second part of this book attempts to answer these questions through a range of historical and contemporary case studies, in Africa, in Asia, in South America, in the Near East and in Europe. The third part of the book offers several critical reflections on European values, motivations and collaboration projects,

as perceived by archaeological heritage professionals based in, and/or working in Senegal, Sudan, Somaliland, Colombia, and the Near East. This collection of historical overviews, contemporary case studies and critical reflections focuses on the challenging relationships between archaeological practices and policies, including the requirements and wishes of archaeologists, of local communities and of other stakeholders in Europe and in the host countries. In addition to researchers and students, this book should be of interest to practicing archaeologists, heritage professionals and policy makers the world over, as they

seek to reach better informed decisions regarding archaeological projects and international collaboration. This publication was produced in the framework of the ACE

project - "Archaeology in Contemporary Europe. Professional Practices and Public Outreach", with the support of the Culture 2007-2013 programme of the European Commission.
