DOYLE WELLS

[The Impact of School Infrastructure on Learning](#) UNESCO Publishing

This volume provides an overview of the changing relationship between cities and the Olympic Games, starting from the year 1896. Blending critical conceptual insight with grounded case studies, this book, divided into three parts, explores the historical experience of staging the Olympics from the point of view of the host city.

[The Palgrave Handbook of Development Cooperation for Achieving the 2030 Agenda](#) Corwin Press

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world. Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional organizations, firms, filmmakers and artists to implement them in a concerted manner.

[GTA 31-01-003 Special Forces Detachment Mission Planning Guide](#) AK Press

Plan enriching Project-Based Learning experiences with ease! If discovering a clear and efficient project-planning process is on your list, prepare to cross it off! This practical guide will help you design and construct project-based learning (PBL) experiences that facilitate deeper learning and develop 21st century skills for your students. Covering steps in the process such as brainstorming, benchmarking, and assessments, this accessible book also features: • #realtalk soundbites that honor the challenges to implementing PBL • Tips and resources to support the project-planning process • Planning forms to guide you through planning your projects • Exercises to help you reflect and process throughout your project plans

[Anarchism, Marxism, and the Future of the Left](#) Routledge

NACTO's Urban Bikeway Design Guide quickly emerged as the preeminent resource for designing safe, protected bikeways in cities across the United States. It has been completely re-designed with an even more accessible layout. The Guide offers updated graphic profiles for all of its bicycle facilities, a subsection on bicycle boulevard planning and design, and a survey of materials used for green color in bikeways. The Guide continues to build upon the fast-changing state of the practice at the local level. It responds to and accelerates innovative street design and practice around the nation.

Tells the true stories of Laika, Belka, Strelka, and the other space dogs who were sent on experimental space flight explorations by the Soviet Union between 1951 and 1956.

[Urban Bikeway Design Guide, Second Edition](#) Skyhorse Publishing

This book is the result of the WHO European Working Group on Health Promotion Evaluation which examined the current range of qualitative and quantitative evaluation methods to provide guidance to policy-makers and practitioners. It includes an extensive c

[The Everything New Teacher Book](#) Routledge

An international joint study by the Food and Agriculture Organization of the United Nations (FAO) and UNESCO's International Institute for Educational Planning (IIEP) was conducted on education and rural development to review the status of the topic from the standpoint of public policies and the conceptual frameworks on which they are based and also to shed light on what may be called "good practice." The findings of the study are meant to serve not as models, but rather as points of reference for all those who are seeking ways of developing education in rural areas and contributing

more effectively to rural development. Chapter I, "Education and Rural Development: Setting the Framework" (David Atchoarena and Charlotte Sedel), provides a contextual and theoretical introduction to the new rural development and poverty reduction thinking, as well as a discussion on the contribution of education to rural development. In Chapter II, "Basic Education in Rural Areas: Status, Issues and Prospects" (Michael Lakin with Lavinia Gasperini), the book reviews in depth the provision of basic education in rural areas and offers some policy directions for improvement. Further exploring a particular dimension of basic education, Chapter III, "Making Learning Relevant: Principles and Evidence from Recent Experiences" (Peter Taylor, Daniel Desmond, James Grieshop and Aarti Subramaniam), devotes specific attention to strategies linking the formal school teaching with students' life environment, including agriculture, and to garden-based learning. The intention is to provide updated information and new insights on much-debated aspects which are often associated with rural areas although their application is much broader. Chapter IV, "Strategies and Institutions for Promoting Skills for Rural Development" (David Atchoarena, Ian Wallace, Kate Green, and Candido Alberto Gomes), shifts the analysis from education to work and discusses the implications of the transformation of rural labor markets for skill development. A particular concern is the rise in rural non-farm employment and the need to enlarge the policy focus from agricultural education and training to technical and vocational education for rural development. This debate is taken further in Chapter V, "Higher Education and Rural Development: A New Perspective" (Charles Maguire and David Atchoarena), which considers higher level skills and the contribution of the tertiary education sector to rural development. Special attention is given to the reform of higher agricultural institutions and lessons based on case studies are provided to document good practice in institutional reform. Finally, Chapter VI, "Main Findings and Implications for Policy and Donor Support" (David Atchoarena with Lavinia Gasperini, Michael Lakin and Charles Maguire), concentrates on the main findings of the study and discusses policy implications and possible responses for donors and countries. (Contains 28 tables, 14 figures, and 64 boxes.).

[Practical Research](#) World Bank Publications

World-renowned urbanist Richard Florida's bestselling classic on the transformation of our cities in the twenty-first century-now updated with a new preface In his modern classic *The Rise of the Creative Class*, urbanist Richard Florida identifies the emergence of a new social class reshaping the twenty-first century's economy, geography, and workplace. This Creative Class is made up of engineers and managers, academics and musicians, researchers, designers, entrepreneurs and lawyers, poets and programmer, whose work turns on the creation of new forms. Increasingly, Florida observes, this Creative Class determines how workplaces are organized, which companies prosper or go bankrupt, and which cities thrive, stagnate or decline. Florida offers a detailed occupational, demographic, psychological, and economic profile of the Creative Class, examines its global impact, and explores the factors that shape "quality of place" in our changing cities and suburbs. Now updated with a new preface that considers the latest developments in our changing cities, *The Rise of the Creative Class* is the definitive edition of this foundational book on our contemporary economy.

[Universality and Identity Politics](#) WHO Regional Office Europe

This open access handbook analyses the role of development cooperation in achieving the 2030 Agenda in a global context of 'contested cooperation'. Development actors, including governments providing aid or South-South Cooperation, developing countries, and non-governmental actors (civil society, philanthropy, and businesses) constantly challenge underlying narratives and norms of development. The book explores how reconciling these differences fosters achievement of the Sustainable Development Goals. Sachin Chaturvedi is Director General at the Research and Information System for Developing Countries (RIS), a New Delhi, India-based think tank. Heiner Janus is a researcher in the Inter- and Transnational Cooperation programme at the German Development

Institute. Stephan Klingebiel is Chair of the Inter- and Transnational Cooperation programme at the German Development Institute and Senior Lecturer at the University of Marburg, Germany. Xiaoyun Li is Chair Professor at China Agricultural University and Honorary Dean of the China Institute for South-South Cooperation in Agriculture. Prof. Li is the Chair of the Network of Southern Think Tanks and Chair of the China International Development Research Network. André de Mello e Souza is a researcher at the Institute for Applied Economic Research (IPEA), a Brazilian governmental think tank. Elizabeth Sidiropoulos is Chief Executive of the South African Institute of International Affairs. She has co-edited *Development Cooperation and Emerging Powers: New Partners or Old Patterns* (2012) and *Institutional Architecture and Development: Responses from Emerging Powers* (2015). Dorothea Wehrmann is a researcher in the Inter- and Transnational Cooperation programme at the German Development Institute.

The New Art Museum Library Fuel Pub

A collection of essays by, and interviews with, the dynamic revolutionary propagandist who is considered by many to be the founder of the social ecology movement. Covers Bookchin's account of his early years as a young communist during the Great Depression; his experiences in the 1960s and reflections on the decade's lessons; his vision of a libertarian communist society; libertarian politics; the future of anarchism; and the unity of political theory and practice. Essential reading for all interested in the history and future of the left.

The Rise of the Creative Class Springer Nature

This book explores the implications of newly developing risks such as hugely damaging hurricanes, new diseases, terrorist attacks, and disruptions to critical infrastructures.

The African Film Industry Rowman & Littlefield Publishers

'Supply Chain Management' illustrates the key drivers of good supply chain management in order to help students understand what creates a competitive advantage. It also provides strong coverage of analytic skills so that students can gauge the effectiveness of the techniques described.

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica Mcgraw-hill

Containing a selection of texts on education prepared during the work of the International Commission on Education for the Twenty-first Century, this volume bears witness to some paradoxes faced by education: to reconcile divergent aims and trends, to embody both continuity and renewal, to encourage conformity and innovation. These papers are intended to complement existing literature to respond to questions that arose in the course of the Commission's work, and to illuminate specific issues that cross disciplines.

Eccentric Creations UNESCO

Updated in its 3rd edition, *Basic Methods of Policy Analysis and Planning* presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban levels. Divided into two parts, *Methods* which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and *Cases* which presents seven policy cases, ranging in degree of complexity, the text provides readers with the resources they need for effective policy planning and analysis. Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems. Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy.

The Assault on Culture Springer Nature

This publication outlines the planning process as it relates to a Special Forces operational detachment-alpha (ODA) conducting deliberate planning for special operations. Planning is an essential task common to all aspects of Special Forces operations. Army Special Operations Forces provide our nation with unique, sophisticated, and tailored capabilities operating in ambiguous, high-risk environments around the world. It is critical that everything addressed during the planning phase is useful and functional. Once planned, the actions of the ODA at the tactical level often have effects at the operational or strategic level. Special Forces planning will take into consideration the full range of the lethal and nonlethal effects based on the combined capabilities of special operations forces available. This planning process supports the United States Government and coalition partner nation objectives.

Educational Planning Prentice Hall

'The Impact of School Infrastructure on Learning: A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning, particularly the aspiration for "accessible, well-built, child-centered, synergetic and fully realized learning environments." Written in a style which is both clear and accessible, it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities, as well as for educators and school leaders. --Yuri Belfali, Head of Division, Early Childhood and Schools, OECD Directorate for Education and Skills This is an important and

welcome addition to the surprisingly small, evidence base on the impacts of school infrastructure given the capital investment involved. It will provide policy makers, practitioners, and those who are about to commission a new build with an important and comprehensive point of reference. The emphasis on safe and healthy spaces for teaching and learning is particularly welcome. --Harry Daniels, Professor of Education, Department of Education, Oxford University, UK This report offers a useful library of recent research to support the, connection between facility quality and student outcomes. At the same time, it also points to the unmet need for research to provide verifiable and reliable information on this connection. With such evidence, decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy, including the construction and maintenance of the school facility. --David Lever, K-12 Facility Planner, Former Executive Director of the Interagency Committee on School Construction, Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided. The authors have finally brought that body of evidence together in this well-structured report. The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come. We should all join this conversation to further the process of globally enhancing learning-environment quality! --David Schrader, AIA, Educational Facility Planner and Designer, Former Chairman of the Board of Directors, Association for Learning Environments (A4LE)

Cities and the Creative Class Routledge

First published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

The Art of Fiction UNESCO/FAO

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books - and the first in Art History - to juxtapose temperate and tropical slavery. Charmaine A. Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest. One could easily assume that nineteenth-century Montreal and Jamaica were worlds apart, but through her astute examination of marine landscape art, the author re-connects these two significant British island colonies, sites of colonial ports with profound economic and military value. Through an analysis of prints, illustrated travel books, and maps, the author exposes the fallacy of their disconnection, arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antiguan genre studies in depth, it also examines the Montreal landscapes of artists including Thomas Davies, Robert Sproule, George Heriot and James Duncan. Breaking new ground, Nelson reveals how gender and race mediated the aesthetic and scientific access of such - mainly white, male - artists. She analyzes this moment of deep political crisis for British slave owners (between the end of the slave trade in 1807 and complete abolition in 1833) who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority, which allowed colonizers to 'civilize' the terrains of the so-called New World, while belying the oppression of slavery and indigenous displacement.

Basic Methods of Policy Analysis and Planning -- Pearson eText Duke University Press

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
