It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. This book offers a novel understanding of the epistemological strategies that are mobilized by the essay film, and of where and how such strategies operate. Against the backdrop of Adorno's discussion of the essay form's anachronistic, anti-systematic and disjunctive mode of resistance, and capitalizing on the centrality of the interstice in Deleuze's understanding of the cinema as

image of thought, the book discusses the essay film as future philosophy-as a contrarian, political cinema whose argumentation engages with us in a space beyond the verbal. A diverse range of case studies discloses how the essay film can be a medium of thought on the basis of its dialectic use of audiovisual interstitiality. The book shows how the essay film's disjunctive method comes to be realized at the level of medium, montage, genre, temporality, sound, narration, and framing-all of these emerging as interstitial spaces of intelligence that illustrate how essayistic meaning can be sustained, often in contexts of political, historical or cultural extremity. The essayistic urge is not to be identified with a fixed generic form, but is rather situated within processes of filmic thinking that thrive in gaps.

Script from the year 2017 in the subject English Language and Literature Studies - Linguistics, grade: 91.1, language: English, abstract: An 'Idiom' is an expression in the usage of a language that has a meaning that cannot be derived from the conjoined meanings of its elements; for example "raining cats and dogs" is an expression that is used to convey the meaning of "raining heavily," but this meaning most of the time cannot be derived from the denotative meaning of the single words that constitute the whole expression. Moreover, an idiom can be looked at as a combination of words whose meaning can be either transparent (can be easily worked out of the literal meaning of the individual words) or opaque (there is no resemblance between the meaning of the individual words and the meaning of the idiom itself). Consider the following examples of transparent idioms that are reasonably obvious: 1. 'Throw someone to the lions' means 'intentionally to put someone in a difficult position', as in: All the commanders were responsible for the tragedies in their last operation, but they threw that junior officer to the lions when they asked him to address the journalists on the reasons of defeat. Idioms like 'sell someone down the river' and 'kick the bucket' are examples of the opaque: 1. Understanding the words of the expression 'sell someone down the river', for instance, will not help you recognize that it actually means 'to betray, or be disloyal to', as in: The kidnapper who was caught by the police refused to sell his associates down the river. Thus, having such

idioms in one book and learning their meaning would be absolutely of a significant help. Interestingly, some English idioms are similar to expressions in other languages, which makes it easy for the learner to figure out their meaning, as in 'hold one's horses' which means 'to stop someone or something, or to make them calm', for example: Hold your horses, I said to my wife when she started packing her luggage.

Scandinavian Christmas Samuel French, Inc.

"A stage vehicle for the Marx Brothers. The scene is the Long Island estate of Mrs. Rittenhouse, a wealthy patroness of the arts with a marriageable daughter. Her celebrity weekend guest is the renowned Captain Jeffrey Spaulding, the African Explorer. He arrives with his secretary, Horatio Jameson, followed by pair of "musicians": Ravelli and the Professor. What follows is typical Marxian lunacy, involving a stolen painting, a surreal bridge game, a Broadway gossip columnist named Wally Winston, a financial wizard formerly known as Abie the Fish Peddler, and a climatic burlesque of Marie Antoinette and the Three Musketeers."--George S. Kaufman website.

In Scandinavia the whole period of Christmas, from the first Sunday in Advent to New Year's Day, is marked by festivals and celebrated in traditional but beautifully contemporary style. Hygge, the Danish word for cosiness, is about being inside with candles, great comfort food and lots of cakes and sweets. The first week of December is baking week - enough has to be made to last the whole Christmas period. Jars of decorated cookies, gingerbread houses and clogs filled with little presents rub shoulders with simple wreaths, trees and tables decorated with

white candles and fresh greenery - the perfect mix of ancient and modern. Brunches, cocktail and tea parties, lunches and dinners are celebrated with a mixture of traditional goodies and delicious modern recipes. Duck and pork rule on Christmas Eve, fish, ham and seasonal vegetables on Christmas Day. Sweets, biscuits, puddings and other treats abound - all washed down with glühwein and fruity cocktails. In this glorious book, illustrated with Lars Ranek's evocative photographs, Trine Hahnemann provides a cornucopia of 70 Christmas recipes - all featuring ingredients which are common to all northern climes - showing us how we, too, can decorate our homes and make delicious dishes to celebrate Christmas the Scandinavian way.

Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical

Functional Grammar, Lexicon Grammar.

Roger II's famous mantle and other royal garments from twelfth- and thirteenth-century Sicily prominently display Arabic

inscriptions. While the phenomenon is highly unusual in the context of Latin Christian kingship, the use of inscriptions as a textile ornament was common and imbued with political functions in the Islamic courts of the medieval Mediterranean. This case study of the inscribed garments from Norman Sicily draws attention to the diverse functions of Arabic textile inscriptions using various contextual frames. Such a contextual approach not only highlights the specificities of the Norman textile inscriptions and emphasises the practical and political choices underlying their use at the Sicilian court, it also pinpoints the flaws of universalising approaches to transcultural ornamental in circulation in the medieval Mediterranean. This new perspective on the royal garments from Norman Sicily draws from a variety of disciplines, including Islamic and European art history, the history of textiles, epigraphy, legal history and historiography, and aims to challenge established notions of cultural and disciplinary boundaries.

This collected volume brings together a wide array of international linguists working on diachronic language change with a specific focus on the history of English, who work within usage-based frameworks and investigate processes of grammatical change in context. Although usage-based linguistics emphasizes the centrality of the discourse context for language usage and cognition, this insight has not been fully integrated into the investigation of processes of grammatical variation and change. The structuralist heritage as well as corpus linguistic methodologies have favoured de-contextualized analytical perspectives on contemporary and historical language data and on the mechanisms and processes guiding grammatical variation and change. From a range of different perspectives, the contributions to this volume take up the challenge of contextualization in the investigation of grammatical variation and change in different stages of English language history and discuss central theoretical notions such as gradable grammaticality, motivation in hypervariation, and hypercharacterization. The book will be relevant to students and linguists working in the field of diachronic and variational linguistics and English language history.

New research on different areas of cognition, focusing on language, with contributions that treat topics explored in Ray Jackendoff's pioneering research. This volume offers new research in cognitive science by leading scholars, exploring different areas of cognition with an emphasis on language. The contributions—in such fields as linguistic theory,

psycholinguistics, evolution, and consciousness—reflect the thriving interdisciplinary scholarship in cognitive science today. Ray Jackendoff's pioneering cross-disciplinary work was instrumental in establishing the field, and *Structures in the Mind*, with contributions from Jackendoff's colleagues and former students, is a testament to his lasting influence. After an introduction that includes short reflections on Jackendoff's work by such scholars as Paul Bloom, Noam Chomsky, Barbara Partee, and Steven Pinker, the book presents chapters on linguistics, which build on Jackendoff's theories of conceptual semantics and parallel architectures; psycholinguistics, reaching from linguistics to psychology and neuroscience; and other topics as varied as the evolution of linguistic and musical abilities, consciousness, music theory, and the grammar of comics—with this particular chapter taking the form of a comic. The chapters present fresh data, bold claims, and stimulating theoretical discussions, offering a celebration of cognitive science today. Contributors Daniel Buring, Neil Cohn, Peter W. Traditional Fair Isle knitting and design skills were originally handed down from one Shetland generation to the next, with each new generation of knitters experimenting, adapting and

extending the repertoire of patterns to develop the Fair Isle knitting we see today. Fair Isle knitting is fascinating - only two colours are used in any single row - yet the patterns and colours chosen combine to create something that is more than the sum of its parts. The distinctive combination of colours and patterns, ranging from the simple to the highly intricate, continues to inspire knitters worldwide. This beautifully illustrated book

includes the development of Fair Isle knitting; a collection of Fair Isle patterns and motifs; exercises to develop a sense of colour and apply colour theory to Fair Isle knitting and a detailed step-by-step guide for the techniques used in Fair Isle knitting. Five original designs, with further ideas for their modification and development are included too as well as guidance on adapting and designing Fair Isle projects of your own.
