Operas in German Routledge

This discography—a finalist in ARSC's 1992 Awards for Excellence—represents a broad and accurate document of the availability of Bruckner's music on records, tapes and compact discs over the last forty years. An indexed list of writers of liner-notes recognizes the important criticism of many prominent

scholars, and a chronology documents trends in the proliferation of recorded performances.

In a pioneering exploration of the intellectual and literary exchange between Russian émigrés and French intelligentsia in the 1920s and 1930s, Leonid Livak provides an impressively comprehensive bibliographic overview of a veritable "who's who" of Russian intellectuals and literati, listing all the material published by Russian émigrés or on topics pertaining to them during the period under study. Focusing attention on a largely ignored chapter of European cultural history, this volume challenges historical assumptions by

demonstrating processes of cultural cross-fertilization and illuminates the precedents Russians set for political exiles in the twentieth century. A remarkable achievement in scholarship, Russian Émigrés in the Intellectual and Literary Life of Inter-War France is a valuable resource for admirers and researchers of French and Russian culture and European intellectual history.

With nearly three thousand new entries,

the revised edition of *Operas in German: A Dictionary* is the most current encyclopedic treatment of operas written specifically to a German text from the seventeenth century through 2016. Musicologist Margaret Ross Griffel details the operas' composers, scores, librettos, first performances, and bibliographic sources. Four appendixes then list composers, librettists, authors whose works inspired or were adapted for the opera librettos, and a chronological listing of the entries in the A-Z section. The bibliography details other dictionaries and encyclopedias, performance studies, collections of plot summaries, general studies on operas, sources on locales where opera premieres took place, works on the history of operas in German, and

selective volumes on individual opera composers, librettists, producers, directors, and designers. Finally, two indexes list the main characters in each opera and the names of singers, conductors, producers, composers, directors, choreographers, and arrangers. The revised edition of *Operas in German* provides opera historians, musicologists, performers, and opera lovers with an invaluable resource for continued study and enjoyment. As the most current encyclopedic collection of German opera from the seventeenth century through the twenty-first, *Operas in German* is an invaluable resource for opera historians, musicologists, performers, and opera lovers. *Habes candide lector Duos tomos isagogae ad lingua[m] graeca[m]*

1997 was an important year for Sint Janskerk in Gouda, as the Museo del Prado in Madrid asked to borrow the cartoon of the King's Window by Dirck Crabeth for the exhibition 'Felipe II. Un príncipe del Renacimiento'. Inspired by this event, it was decided to compile an anthology about the church's seventh window. Based on the many-faceted topic an international group of scholars from various disciplines studied the stained-glass window in depth as a crucial presentation of Philip II's Netherlandish and English years. An important step in current research into an enthralling era in European history of

the sixteenth century.

This volume looks at the implications of transcultural humanities in South Asia, which is becoming a crucial area of research within literary and cultural

studies. The volume also explores various complex critical dimensions of transculturation, its indeterminate periodisation, its temporal and spatial nonlinearity, its territoriality and intersectionality. Drawing on contributors from around the globe, the entries look at literature and poetics, theory and praxis, borders and nations, politics, Partition, gender and sexuality, the environment, representations in art and pedagogy and the transcultural classroom. Using key examples and case studies, the contributors look at current developments in transcultural and transnational standpoints and their possible educational outcomes. A broad and comprehensive collection, as it also speaks about the value of the humanities and the significance of South

Asian contexts, Transcultural Humanities in South Asia will be of particular interest to those working on postcolonial studies, literary studies, Asian studies and more.

Catch the IPv6 wave--discover the power of the next-generation Internet Protocol and how to migrate your existing systems from IPv4 to IPv6! With the Internet doubling in size every 10 to 12 months and the market increasingly demanding live audio and video transmission over the Internet, the time has come for a next-generation Internet Protocol that will be able to cope with these rapidly escalating user volume and traffic demands. Enter IPv6--the result of 7 years of work by the Internet Engineering Task Force to find a successor to IPv4. It put on the Internet

Standards Track in December 1995 and will soon be rolling into the marketplace. Network professionals everywhere--integrators, network architects, network managers, technical managers, and others planning to make the transition from IPv4 to IPv6--owe it to themselves and their organizations to learn everything they can about IPv6 now. And this first-of-its kind hands-on guide to IPv6 is the easiest and most accessible place to start. It includes detailed discussions of IPv6 theory, applications, configuration and vendor offerings, along with a number of other topics: the role of IPv6 in the TCP/IP architecture; new features in Internet Control Message Protocol for IPv6; how to send multimedia presentations and messages over the Internet using IPv6

and multicasting; the expanded 128-bit addressing capabilities of IPv6 and how domain names are translated into IP addresses; tunneling in the IPv6 environment, and much more. Plus, it provides hands-on practical examples of how to: manage the IPv6 intranet address space, design an intranet routing hierarchy, set up and manage an

IPv6 security system, and migrate existing applications and network services to help.
