Including two new chapters on Alex Honnold's free solo ascent of the iconic 3,000-foot El Capitan in Yosemite National Park. On June 3rd, 2017, Alex Honnold became the first person to free solo Yosemite's El Capitan—to scale the wall without rope, a partner, or any protective gear—completing what was described as "the greatest feat of pure rock climbing in the history of the sport" (National Geographic) and "one of the great athletic feats of any kind, ever" (New York Times). Already one of the most famous adventure athletes in the world, Honnold has now been hailed as "the greatest climber of all time" (Vertical magazine). *Alone on the Wall* recounts the most astonishing achievements of Honnold's extraordinary life and career, brimming with lessons on living fearlessly, taking risks, and maintaining focus even in the face of extreme danger. Now Honnold tells, for the first time and in his own words, the story of his 3 hours and 56 minutes on the sheer face of El Cap, which *Outside* called "the moon landing of free soloing...a generation-defining climb. Bad ass and beyond words...one of the pinnacle sporting moments of all time."

The legendary overland silk road was not the only way to reach Asia for ancient travelers from the Mediterranean. During the Roman Empire's heyday, equally important maritime routes reached from the Egyptian Red Sea across the Indian Ocean. The ancient city of Berenike, located approximately 500 miles south of today's Suez Canal, was a significant port among these conduits. In this book, Steven E. Sidebotham, the archaeologist who excavated Berenike, uncovers the role the city played in the regional, local, and "global" economies during the eight centuries of its existence. Sidebotham analyzes many of the artifacts, botanical and faunal remains, and hundreds of the texts he and his team found in excavations, providing a profoundly intimate glimpse of the people who lived, worked, and died in this emporium between the classical Mediterranean world and Asia.

This unique architecture atlas shows the most remarkable buildings in the world. Children and adults will marvel in amazement. Mali, in North Africa, is home to the largest building made out of clay; the structure only took one year to complete. For the construction of Neuschwanstein Castle, 465 tons of marble were hefted to the Alps to the building site. The Atomium in Brussels boasts the longest escalators in Europe. The largest mosque in the world is as big as 56 football fields. *The Illustrated Atlas of Architecture and Marvelous Monuments* presents a world of breathtaking buildings and their incredible stories through illustrated maps and engaging factsheets. Sarah Tavernier and Alexandre Verhille have already deftly shown with *Legendary Routes of the World* that they are experts in showcasing the biggest and the best. Now, for *The Illustrated Atlas of Architecture and Marvelous Monuments*, they researched the longest bridges, tallest towers, the most impressive cultural sites, and plenty of curiosities. Exciting facts are woven together with a myriad of architectural styles; the material feats are skillfully and artfully placed upon bold maps, situating the constructions within a geographic context.

Tourism Routes and Trails plunges into the world of 'extended' tourism, offering an exploration of the 'routes' phenomenon whereby tourism is no longer for a given destination, but extends over multiple sites, a territory or landscape. Covering how such routes are created, often as ways of clustering experiences, it also reviews their effects on tourism businesses, local populations and other stakeholders.

Legendary Maps from the Himalayan Club Monaco Books / Kunth Verlag

*Includes pictures *Includes descriptions of the routes and the goods traded *Includes online resources, footnotes, and a bibliography for further reading "Sometimes a journey arises out of hope and instinct, the heady conviction, as your finger travels along the map: Yes, here and here... and here. These are the nerve-ends of the world..." - Colin Thubron The story of the Silk Road has been a popular topic among tourists, academics, economists, state parties, and daydreaming children for many centuries. In many ways the Silk Road can be seen everywhere, and it has existed for as long as people have traveled across Eurasia. Its impact is widely felt among the diverse peoples that live on the continent, through the unique regional art and architectural styles, as well as in countless films, books, academic studies, and organized tours devoted to the ancient trade routes. At the same time, however, the Silk Road is an entirely abstract invention, first coined by the 19th century German geographer Ferdinand von Richthofen. There has never existed a single route - let alone a road - that was used to transfer goods, nor was silk the primary commodity traded across Eurasia. Instead, the Silk Road is more a multi-layered narrative about the rise and fall of nomadic confederations and sedentary societies, the consolidation and dissolution of kingdoms and empires, the exchange of commodities and fine crafts, and the transfer and mixture of ideas, religions, technology, science, art, architecture, myths and legends. It is a story that is relevant for the present-day countries through which this exchange once took place, as they lay claim to the artifacts, heritage sites, and symbolic meaning of the Silk Road for political and economic purposes and to build their national identity. For these reasons, the Silk Road can be viewed not as a clearly demarcated thing with a linear history, but a set of attitudes and relationships with the past by particular people at a particular time for particular reasons. Certain parts of the Silk Road's past are better studied and known, according to modern society's current principles of value and knowledge, but there is so much that remains to be discovered, either buried in the sands of the area, in a dusty museum warehouse, or hidden in a long-forgotten archive. Regardless, no matter how much new information is discovered, the Silk Road still manages to conjure up romantic images of legendary figures, great networks of trade routes, and the human spirit of exploration into the unknown. The Silk Road: The History and Legacy of the Trade Routes that Connected Europe and Asia examines the crucial trade links between the East and West, and the important cultural effects it had over the centuries. Along with pictures of important people, places, and events, you will learn about the Silk Road like never before, in no time at all.

The Silk Road Taylor & Francis

This substantial collection of newly commissioned essays presents an ambitious, entertaining, and accessible guide to developments in Asian art over the past 20 years of the epoch of globalization. The term 'global Asia' signals the genesis and evolution of contemporary art within the context of global economic, social, political, and intellectual change related to the end of the Cold War, decolonization, the emergence of postcolonial societies and cultures, and the rise of a global contemporary art world. In the handbook its editors establish, in an extended introductory section and in four section introductions, the theoretical, geographical, and historical parameters within which the contemporary visual arts of 'global Asia' may be described, analyzed, and evaluated. The collected chapters provide a diverse, multi-authored, heterogeneous, and genuinely plural account of art and its contexts. The democratic and inclusive character of globalization is reflected and produced within this anthology, which includes different styles of writing as well as varieties of analytic and thematic focus. The anthology will appeal to both scholars and students in art history, art practice, curation, contemporary art, fine art, cultural studies, and globalization studies.

This book combines academic analysis and critical exploration to examine national narratives in the context of tourism and events around the world. It explores how particular narratives are woven to tell (and sell) a national story. By deconstructing images of the nation, it closely examines how national texts create key archival imagery that can promote tourism and events while also shaping national identity. It investigates the complex relationship between state appropriation of marketing strategies and the commercial use of nationalist discourses. The book aims to demystify the ways in which the nation is imagined by key organisers and organisations and then communicated to millions.

This book provides the first synthetic review of the literature on cultural roads and itineraries, providing a template for developing typologies and clarity on existing research. It additionally develops a unique conceptual framework for understanding the social, political, ethical, and spatial dynamics behind cultural roads and itineraries. The book takes the discussion on cultural roads in two different directions. Firstly, by taking a step back from tourism studies, leisure studies, and heritage studies in order to further the conversation on cultural roads with a broader set of disciplines, namely those in the humanities and social sciences. Secondly, through a series of

broader theoretical reflections and considerations, the book draws its focus back to the development of the cultural road and cultural itineraries with a new conceptual apparatus that can inspire new questions for research and new ideas for practice. Throughout the text, concepts, theories, principles, and practices are explored and explained through detailed case study analyses.
