European Gastronomy into the 21st Century
Martinus Nijhoff Publishers
The European Yearbook has expanded over the years in keeping with the role played by European institutions compared with national ones. It is an indispensable work of reference for anyone dealing with these institutions, which have

become so numerous & varied that no-one can possibly memorise all their acronyms or functions. The European Yearbook provides aids for finding one's way through the labyrinth of these organisations which coordinate a variety of activities in over 20 countries. One of the aids is an 'organisation chart' at the beginning of the documentary section, giving a clear picture of the general situation. A perusal of the many contributions in the volume organisation by organisation, shows the full diversity of the activities which Europe is gradually taking over from national governments, with their consent & financial support. Written in both of the Council of Europe's official languages, English & French, the European Yearbook also contains a general index by subject & name which constitutes a very valuable list of articles & provides direct access to the work's subject matter, regardless of the particular organisation concerned, offering a kind of cross-section of the activities of European organisations.

analysis, commentary and documentation in relation to conflict management, international legal developments and domestic legislation affecting minorities in Europe. "Part I" contains scholarly articles and, in 2003/4, features two special focus sections on The Impact of Islam in Europe and Economic Participation of Minorities. "Part II" reviews the implementation of minority legislation and international standards at the universal and regional levels as well as new developments in relation to them and contains a list of international norms. Apart from providing a unique annual overview of minority issues for both scholars and practitioners in this field, the Yearbook is an indispensable reference tool for libraries, research institutes as well as governments and international organisations.

La Noblesse À Table Univ of California Press
A complete modern typeface edition of the account by British Army major W E Frye of his travels around Europe in the aftermath of the Battle of Waterloo. As well as giving his opinions on the various European towns and cities he passes through, he vividly describes European culture in the early 19th Century, with detailed accounts of the Theatre, Opera and the Arts in France, Italy & Switzerland in particular. His experiences of post-Waterloo Europe left him with an generally positive view of Napoleon and the book gives an interesting insight into the contemporary opinions of the French leader and his effect on Continental

Europe.

Gastronomy is the art and science of good eating and drinking: a concept that extends outwards to embrace wider notions of tradition, culture, society and civilisation. This book provides a rigorous, well researched and much needed treatment of the subject, systematically outlining: * the development of European gastronomic tradition, and the social, economic, philosophical and geographical contexts of change * the experiences, philosophies and relative contributions of great gastronomes, past and present * the interplay of traditional and contemporary influences on modern gastronomy * the relationship between gastronomy and travel and tourism * salient issues of nutrition, food hygiene and health promotion Taking an all-encompassing look at the subject of gastronomy

past, present and future, 'European Gastronomy into the 21st Century' uses example menus and case studies to demonstrate the theory. It also provides an insight into the business arena, using key destination restaurants to illustrate management techniques and marketing issues. Accessible and highly structured, the book guides the reader through its wide-ranging and thought-provoking content.

Academic Conferences and publishing limited Presenting a rare glimpse into the dining rooms of Belgian nobility from the Middle Ages to modern times, specialists in the field discuss gastronomy and festive culture in a historical and sociological context. This stunning work provides insights into both the culinary proclivities and table manors of these epic gourmands, answering such questions as What was the daily menu of the dukes of Burgundy? What was behind the sudden enthusiasm for saltwater fish in the 17th century?

and Why were exotic desserts so popular in the 19th century? A valuable addition to the historical study of Belgian

Noblemen and the ruling elite, this bilingual collection--presented in both English and French--creates a wonderfully rich portrait of the past, from the dukes of Burgundy to Belgian royalty.

Annuaire Europeen 1988 - European Yearbook 1988

The "European Yearbook" promotes the scientific study of nineteen European supranational organisations and the OECD. The series offers a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date overview of the member states of each

organisation. This special anniversary volume celebrates 60 years of publication of the Yearbook, and its contents differs from that of the regular volumes therefore. It offers a selection of the most important articles, dealing with European cooperation and integration, to appear in the Yearbook during its 60 years of publication. These are of particular interest not only because they provide a unique historical snapshot of the many successes (and occasional failures) in the field of European integration but also because they discuss the ideals and aims that lay behind these efforts, many of which still resonate today as Europe confronts questions about its political destiny and ideal shape. This volume contains articles in English and French."

The year 2000's most significant international event was, almost certainly, neither political nor military, but scientific - the announcement, in June, that the human genome had been almost totally decoded. Future generations may well see this as a major turning point, opening the way to radical changes in diagnosis, prognosis, and medical treatment. Often compared with the space programme, this vast enterprise still generates misgivings: this new power, which human beings now have, to modify the genetic heritage of living creatures raises fundamentally new ethical questions - and society as a whole will have to find the answers. In fact, the

accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties, some rational, others less so. Recent public-health crises, including the mad cow disease' scare, which lasted into 2000, have fuelled these fears. The public's rejection of GMOs (Genetically Modified Organisms) - verging on a crusade in some countries - tells its own story. As regards conflict, 2000 saw the Middle East peace process grind to a halt, and the Intifada resume. In Europe, the situation in Kosovo and Chechnya, both the scenes of fighting in 1999, stayed precarious. Peace and democracy did score some successes, however, particularly in Europe: the centre-left's victory in Croatia, sweeping former President Tudjman's party off the scene, the democratic party's

triumph in Bosnia, and the fall of the Milosevic regime in Serbia.
