International Conference on Information Systems and Intelligent Applications IGI Global

Selected extended papers from the Brazilian-German Conference on Frontiers of Science and Technology Symposium (BRAGFOS), Potsdam 5.-10- October 2017 In October 2017 the 8th Brazilian-German Frontiers of Science and Technology Symposium (BRAGFOS) was held in Potsdam, Germany, gathering German and Brazilian researchers in the fields of Hybrid climate-control strategies, Multifunctional integration, Light-weight structures, Energy Harvesting, and Urban agriculture. This series of symposia, initiated in 2010, is the result of the collaboration between the Alexander von Humboldt Foundation (AvH) and the Brazilian Federal Agency for Support and Evaluation of Graduate Education (CAPES), and has a special format. Experienced specialists are giving overviews about their research which covers a wide area and making it accessible for specialists from other fields of science and technology.

Tactical Uses of Vertical Lift Aircraft Bangkok : United Nations

To meet energy conservation goals of the Navy, its attention has been focused on ways to reduce individual ship total resistance and powering requirements. One possible method of improving ship powering characteristics is by modifying existing individual ship hulls with the addition of bulbous bows. This paper will identify the merits of retrofitting bow bulbs on selected U.S. Navy auxiliary and amphibious warfare ships. A procedure for performing a cost/benefit analysis will be shown for candidate ship classes. An example of this technique for an amphibious warfare ship will also be provided. A brief discussion of future methods to be used for bulbous bow design such as application of systematic model test data and numerical hydrodynamic techniques will be given. (Author).

Recent Developments in Machine Learning and Data Analytics Walter de Gruyter GmbH & Co KG

This session centered on the current capabilities of several commercially available graphics systems in parts nesting and computer aided shipyard drafting. Three representatives of graphics system vendors participated on a panel to answer questions from the audience concerning their products' capabilities and graphics systems in general. These representatives were Dr. Robert Cowen of Computervision Corporation. Robert N. Hickox of Adage, Inc. and Lou Melancon of Auto-Trol Corporation. In addition, a representative of the Italian yard Italcantieri S.p.A. was on hand to relate that yard's experience in the use of Adage equipment for interactive nesting. Of interactive nesting Italcantieri, in response to questions from the floor, has seen a reduction in nesting labor as a result of using their system from between 20,00 to 24,000 man-hours per year. He further stated this effort represented the production of some 2500 nest tapes. On the topic of system reliability the vendors reported uptimes for their systems in excess of 95%. The cost of these systems was also questioned. Without a clear description of the application, number of users, etc. of such a system, the vendors were able to respond only that the costs ranged from around \$100,000 for a single user drafting system on up. On the topic of computer aided design systems two members of the audience reported on the Navy's development efforts in this area. Two current applications cited in the Navy are a computer aided hull lines generation system employing interactive graphics and a graphics assisted ship's arrangements program.

The National Shipbuilding Research Program. Proceedings of the REAPS Technical Symposium. Paper No. 25: Special Interest Group Reports Springer Science & Business Media

This volume constitutes the proceedings of the 18th International Conference on Intelligent Tutoring Systems, ITS 2022, held in Bucharest, Romania, in June 2022. The 14 full papers, 13 short papers and 11 poster papers presented in this volume were carefully reviewed and selected from 50

submissions. The papers are categorized into the following topical sub-headings: Tools and Methods for Learning Sciences and Practices; Algorithms for Prediction, Recommendation and Classification in Learning Systems; Tutoring and Learning Systems: New Approaches, Framework and Theories.

International Organization and Conference Series Disha Publications

The four-volume set LNCS 3480-3483 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2005, held in Singapore in May 2005. The four volumes present a total of 540 papers selected from around 2700 submissions. The papers span the whole range of computational science, comprising advanced applications in virtually all sciences making use of computational techniques as well as foundations, techniques, and methodologies from computer science and mathematics, such as high performance computing and communication, networking, optimization, information systems and technologies, scientific visualization, graphics, image processing, data analysis, simulation and modelling, software systems, algorithms, security, multimedia etc.

Space Shuttle Technical Conference, Part 1 Springer Nature

Symposium 97 was the fourteenth international symposium on methodological issues sponsored by Statistics Canada. Each year, the symposium focuses on a particular theme. This year's theme was on new directions in surveys and censuses. The 1997 symposium attracted over 500 people who met over three days at the Palais des Congrès in Hull to listen to over 70 presentations by experts from various statistical and other government agencies, universities and the private sector. Aside from translation and Aormatting, the papers submitted by the presenters have been reproduced in these proceedings.

Federal Register Micromedia, [1998 or 1999]

- Best Selling Book in English Edition for IBPS RRB SO IT Officer (Scale-II) Exam 2022 with objective-type questions as per the latest syllabus given by the Institute of Banking Personnel and Selection.
- Compare your performance with other students using Smart Answer Sheets in EduGorilla's IBPS RRB SO IT Officer (Scale-II) Exam 2022 Practice Kit.
- IBPS RRB SO IT Officer (Scale-II) Exam 2022 Preparation Kit comes with 10 Full-length Mock Tests with the best quality content.
- Increase your chances of selection by 14X.
- IBPS RRB SO IT Officer (Scale-II) Exam 2022 Prep Kit comes with well-structured and 100% detailed solutions for all the questions.
- Clear exam with good grades using thoroughly Researched Content by experts.

Frontiers of Science and Technology Springer Nature

This concise yet thorough textbook presents an active-learning model for the teaching of computer science. Offering both a conceptual framework and detailed implementation guidelines, the work is designed to support a Methods of Teaching Computer Science (MTCS) course, but may be applied to the teaching of any area of computer science at any level, from elementary school to university. This text is not limited to any specific curriculum or programming language, but instead suggests various options for lesson and syllabus organization. Fully updated and revised, the third edition features more than 40 new activities, bringing the total to more than 150, together with new chapters on computational thinking, data science, and soft concepts and soft skills. This edition also introduces new conceptual frameworks for teaching such as the MERge model, and new formats for the professional development of computer science educators. Topics and features: includes an extensive set of activities, to further support the pedagogical principles outlined in each chapter; discusses educational approaches to computational thinking, how to address soft concepts and skills in a MTCS course, and the pedagogy of data science (NEW); focuses on teaching methods, lab-based teaching, and research in computer science education, as well as on problem-solving strategies; examines how to recognize and address learners' misconceptions, and the different types of questions teachers can use to vary their teaching methods; provides coverage of assessment, teaching planning, and designing a MTCS course; reviews high school teacher preparation programs,

and how prospective teachers can gain experience in teaching computer science. This easy-to-follow textbook and teaching guide will prove invaluable to computer science educators within all frameworks, including university instructors and high school teachers, as well as to instructors of computer science teacher preparation programs.

[Annual Technical Symposium \(21st\). The Engineering Challenge of a Growing Navy: Retrofitting of Bulbous Bows on U.S. Navy Auxiliary and Amphibious Warfare Ships for Fuel Savings](#) Springer

In the age of corporate responsibility, green technology and sustainability continue to grip the consciousness of business and academic institutions. However, development of appropriate business-driven green applications requires an awareness of best practices of the green agenda. Green Technology Applications for Enterprise and Academic Innovation addresses the importance of green technology and sustainability for technology, enterprise, and academic innovation in energy management, renewable energy, and carbon reduction strategies. This book acts as the bridge for practitioners, academia, businesses, industrialists, governmental executives, and students seeking research in this emerging area.

Proceedings of the 4th Brazilian Technology Symposium (BTSym'18) EduGorilla Community Pvt. Ltd.

This book presents high-quality papers from an international forum for research on computational approaches to learning. It includes current research and findings from various research labs, universities and institutions that may lead to development of marketable products. It also provides solid support for these findings in the form of empirical studies, theoretical analysis, or comparison to psychological phenomena. Further, it features work that shows how to apply learning methods to solve important application problems as well as how machine learning research is conducted. The book is divided into two main parts: Machine Learning Techniques, which covers machine learning-related research and findings; and, Data Analytics, which introduces recent developments in this domain. Additionally, the book includes work on data analytics using machine learning techniques.

Footwear Technology Symposium Springer Nature

What is the optimum organizational pattern in a shipyard for application of Numerical Control (NC)? A precise answer to this question does not exist. Many things influence a shipyard's operation: management attitudes, personnel availability, finances, and geographical limitations are but a few. Without consideration for any of these factors, a good NC structure for a shipyard should be as follows: A computer applications section to develop or procure the software necessary for a good NC program; A fairing group, established in a department, that has the ability to manually fair a ship, and the adaptability to learn computer fairing; A scientific section that uses the data base for hull calculation programs, and provides the basic information needed for fairing and hullload; A hull engineering department, producing accurate drawings by utilizing the data base for drafting purposes, and supplying detailed information for fairing and hullload; A hullload group initial loading comprised of engineering and NC loft people -- of the data base should be done by hull engineering, with the NC loft, taking responsibility for the maintenance of hullload when part generation begins; and An NC mold, under production management, whose duties include part generation and nesting programming, as well as data base control -- this group should have access to whatever equipment

is necessary to accomplish their duties. A review of the NC operations of several successful shipyards will be an effective method of determining a suitable NC system. Such a study will enable management to decide what hardware, software, and organizational pattern would best suit their needs.

The Proceedings of the Twenty-ninth SIGCSE Technical Symposium on Computer Science Education

This book presents the Proceedings of The 4th Brazilian Technology Symposium (BTSym'18). Part I of the book discusses current technological issues on Systems Engineering, Mathematics and Physical Sciences, such as the Transmission Line, Protein-modified mortars, Electromagnetic Properties, Clock Domains, Chebyshev Polynomials, Satellite Control Systems, Hough Transform, Watershed Transform, Blood Smear Images, Toxoplasma Gondii, Operation System Developments, MIMO Systems, Geothermal-Photovoltaic Energy Systems, Mineral Flotation Application, CMOS Techniques, Frameworks Developments, Physiological Parameters Applications, Brain Computer Interface, Artificial Neural Networks, Computational Vision, Security Applications, FPGA Applications, IoT, Residential Automation, Data Acquisition, Industry 4.0, Cyber-Physical Systems, Digital Image Processing, Patterns Recognition, Machine Learning, Photocatalytic Process, Physical-chemical analysis, Smoothing Filters, Frequency Synthesizers, Voltage Controlled Ring Oscillator, Difference Amplifier, Photocatalysis and Photodegradation. Part II of the book discusses current technological issues on Human, Smart and Sustainable Future of Cities, such as the Digital Transformation, Data Science, Hydrothermal Dispatch, Project Knowledge Transfer, Immunization Programs, Efficiency and Predictive Methods, PMBOK Applications, Logistics Process, IoT, Data Acquisition, Industry 4.0, Cyber-Physical Systems, Fingerspelling Recognition, Cognitive Ergonomics, Ecosystem services, Environmental, Ecosystem services valuation, Solid Waste and University Extension. BTSym is the brainchild of Prof. Dr. Yuzo Iano, who is responsible for the Laboratory of Visual Communications (LCV) at the Department of Communications (DECOM) of the Faculty of Electrical and Computing Engineering (FEEC), State University of Campinas (UNICAMP), Brazil.

[International Technical Conference on Experimental Safety Vehicles. Tenth. \[Proceedings.\]](#)

This book sheds light on the fundamental and innovative topics in information systems and their societal impact on individuals and organizations. It mainly focuses on the role of artificial intelligence in organizations, human-computer interaction, IS in education and industry, and IS security, privacy, and trust. The outcomes are expected to assist the decision-makers in formulating the required policies and procedures for using cutting-edge technologies.
