National Geographic Books

In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed *Ships of the Line* hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship *H.M.S. Beagle*—without weapons—that proved untenable. From the start, Starfleet realized that each

vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed *Ships of the Line* hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful *Star Trek: Ships of the Line* calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life.

The Making of Star Trek National Geographic Books

""A strange, violent period in your history."" -- Spock Many unanswered questions remain about the terrible Eugenics Wars that raged on Earth during the 1990s, an apocalyptic conflict that brought civilization to the brink of a new dark age. Centuries later, as Capt. James T. Kirk and the crew of the Starship Enterprise™ are forced to defend a colony of genetically enhanced humans against Klingon aggression and sabotage, Kirk

must probe deeper into the past -- and into the glory days of one of the greatest adversaries he has ever faced. 1992. Almost twenty years ago, Gary Seven and Roberta Lincoln, undercover operatives for an unknown alien civilization, failed to prevent the Chrysalis Project from creating an entire generation of supermen and women, genetically engineered to be stronger, smarter, and more resourceful than ordinary human beings. Now, at last, the children of Chrysalis have grown to adulthood, and are rapidly demonstrating that superior abilities spawn superior ambition. Perhaps the most formidable of this new breed of supermen is the charismatic Khan Noonien Singh. Working behind the scenes of history as head of a vast global conspiracy, Khan's power soon stretches across a quarter of the planet, but that is only the beginning of his grand design. Determined to unite humanity beneath the enlightened rule of a genetic elite, Khan dreams of leading his fellow superhumans to complete and total domination of the world. But several of his gene-engineered brothers and sisters have equally grandiose visions for the future, visions that recognize no one but

themselves as supreme ruler.
