[Implementation Research Toolkit MIRA](#)
 Up-to-date discussion of the etiology, diagnosis, treatment, and prevention of this common cause of stroke and cognitive impairment.

The Lakeside Annual Directory of the City of Chicago Princeton University Press

The creative and science-driven design of the point of sale has become a crucial success factor for both retailers and service businesses. In the newly revised and expanded edition of this book, you will learn some of the shopper marketing secrets from the authors about how you

can design your store to increase sales and delight shoppers at the same time. By the time you are through reading, you will have learned how shoppers navigate the store, how they search for products, and how you can make them find the products you want them to see. You will also be able to appeal to shopper emotions through the use of colors, scents, and music, as well as make shopping memorable and fun by creating unique experiences for your shoppers. The focus is on the practical applicability of the concepts discussed, and this accessible book is firmly grounded in consumer and psychological research. At the end of each chapter, you will find several takeaway points. The book concludes with the "Store Design Cookbook," full of ready-to-serve

recipes for your own store design and visual merchandising process.

This book explores the linguistic expression of identity, intended as the social positioning of self and others, by focusing mostly on a scenario of prolonged

language contact, namely the ancient Mediterranean area. The volume includes studies on language contact and on identity strategies developed at different levels of analysis, from phonetics to pragmatics, in, among others, Latin, Greek, Coptic, Syriac, (Cypriot) Arabic, Medieval Sardinian.

If you think sumptuous desserts and healthy eating don't go together, you'll change your mind when you see the tempting, yet delightfully healthy desserts that Bo Friberg has added to the Third Edition of this ever-popular pastry cookbook. The Light Desserts chapter now offers twice as many mouth-watering desserts that will please your palate, your heart, and your waistline. The Third Edition on The Professional Pastry Chef offers hundreds of tempting, easy-to-follow recipes that range from classical to contemporary favorites. Here is a complete guide to the preparation and artful presentation of a bounty of pastries and desserts, including breads, cakes, cookies, pastries, ice creams, candies, and restaurant desserts. Instructions for every recipe have been rewritten using shortened, numbered steps to make them as easy to follow as possible. Each recipe - thoroughly tested by the author and thousands of his students - has been refined to perfection and is virtually foolproof. In brand new, consolidated introductions to each recipe, Master Pastry Chef Bo Friberg carefully explains the proper blending of ingredients, use of pastry equipment, alternate presentations, and professional techniques so you can produce professional results the first time.

The governance and evaluation of 'megaprojects' - that is, large-scale, complex, high-stakes infrastructure projects usually commissioned by governments and delivered through partnerships between public and private organisations - is receiving increased attention. However, megaproject evaluation has hitherto largely adopted a linear-rationalist perspective to explain the frequent failure of such projects to meet

the 'iron triangle' of performance criteria: delivering on time, within budget, and according to specifications. This approach recommends greater control and accountability to remedy megaproject 'pathologies'. Drawing on empirical examples mainly from the transport sector and radioactive waste disposal, this book offers new perspectives to megaproject evaluation. Comprising contributions from leading experts in project evaluation and appraisal, this collection opens up new avenues by suggesting two ways of improving megaproject evaluation: 1) approaches that go beyond the dominant linearrationalist notion of policy processes, and emphasise instead the objective of opening up appraisal processes in order to enhance learning and reflexivity; and 2) approaches that extend evaluative criteria beyond the 'iron triangle', to cover the various socioeconomic impacts and preconditions for project success. This volume will be of great relevance to scholars and practitioners with an interest in megaprojects, energy and climate policy, radioactive waste management, urban design, and project planning and management.

Cerebral Small Vessel Disease Routledge
This comprehensive new edition of *How to Design Cars Like a Pro* provides an in-depth look at modern automotive design. Interviews with leading automobile designers from Ford, BMW, GM Jaguar, Nissan and others, analyses of past and present trends, studies of individual models and concepts, and much more combine to reveal the fascinating mix of art and science that goes into creating automobiles. This book is a must-have for professional designers, as well as for automotive enthusiasts.

In a family with so many boys, Ellie often feels frustrated by her four brothers. Ellie's independent attitude goes too far and she finds herself in trouble. Will brotherly love save the day?

Store Design and Visual Merchandising, Second Edition Cambridge University Press

For the Balinese, the whole of nature is a perpetual resource: through centuries of carefully directed labor, the engineered landscape of the island's rice terraces has taken shape. According to Stephen Lansing, the need for effective cooperation in water management links thousands of farmers together in hierarchies of productive relationships that span entire watersheds. Lansing describes the network of water temples that once managed the flow of irrigation water in the name of the Goddess of the Crater Lake. Using the techniques of ecological

simulation modeling as well as cultural and historical analysis, Lansing argues that the symbolic system of temple rituals is not merely a reflection of utilitarian constraints but also a basic ingredient in the organization of production.

Teiwa is a non-Austronesian ('Papuan') language spoken on the island of Pantar, in eastern Indonesia. It has approximately 4,000 speakers and is highly endangered. The genetic relationship between the Alor-Pantar languages and other Papuan languages remains controversial. Located some 1,000 km from their putative Papuan outliers. This volume presents a grammatical description of one of these 'outlier' languages. The grammar is based on primary field data, collected by the author in 2003-2007. A selection of glossed and translated Teiwa texts of various genres and world lists (Teiwa-English/English-Teiwa) are included

THE SERIES: FRONTIERS IN

COMPUTATIONAL INTELLIGENCE The series *Frontiers In Computational Intelligence* is envisioned to provide comprehensive coverage and understanding of cutting edge research in computational intelligence. It intends to augment the scholarly discourse on all topics relating to the advances in artificial life and machine learning in the form of metaheuristics, approximate reasoning, and robotics. Latest research findings are coupled with applications to varied domains of engineering and computer sciences. This field is steadily growing especially with the advent of novel machine learning algorithms being applied to different domains of engineering and technology.

The series brings together leading researchers that intend to continue to advance the field and create a broad knowledge about the most recent research. Series Editor Dr. Siddhartha Bhattacharyya, CHRIST (Deemed to be University), Bangalore, India Editorial Advisory Board Dr. Elizabeth Behrman, Wichita State University, Kansas, USA Dr. Goran Klepac Dr. Leo Mrcic, Algebra University College, Croatia Dr. Aboul Ella Hassanien, Cairo University, Egypt Dr. Jan Platos, VSB-Technical University of Ostrava, Czech Republic Dr. Xiao-Zhi Gao, University of Eastern Finland, Finland Dr. Wellington Pinheiro dos Santos, Federal University of Pernambuco, Brazil

Socioeconomic Evaluation of

Megaprojects Top That! Publishing Vehicle Design guides readers through the methods and processes designers use to create and develop some of the most stunning vehicles on the road. Written by Jordan Meadows, a designer who worked on the 2015 Ford Mustang, the book contains interviews with design directors at firms including Fiat Chrysler Automobiles, Hyundai Motor Group, and Ford Motor Company, amongst other professionals. Case studies from Ford, Mazda, and Jeep illustrate the production process from research to execution with more than 245 color behind-the-scenes images in order to help readers create vehicles drivers will cherish.

One of the most charming Cinderella stories of all time! Lord Bannor the Bold has never feared anything in his life--until the war ends and he finds himself a reluctant papa to a dozen unruly children. He sends his steward out to find them a mother--some meek, plain creature who won't tempt him to get her with child. But his steward returns with a spirited beauty who makes him think of nothing else. Lady Willow is everything Bannor has sworn to resist. He never dreams she will join forces with those mischievous imps of his to teach him just how sweet surrender can be! Book 1 in Teresa Medeiros's ONCE UPON A TIME Series, which includes *Charming the Prince*, *The Bride and the Beast* and *Fairest of Them All* Praise for

Implementation research is conducted within routine systems and real life settings, removed from the controlled settings associated with other types of scientific research. This toolkit was designed to help people learn a standard process that would lead to results that could be compared across regions and countries. It is designed to help identify system bottlenecks and the stakeholders to be involved, formulate appropriate research questions, conduct the research and develop a plan for implementing the study results. Who can use this toolkit? Health care service providers Program staff Researchers Decision-makers Finance and administration officers Media Learn how to: Identify barriers to implementation and formulate the research question Make your case for funding Set up a study design and appropriate methodologies Plan the project (budget, personnel, timelines, monitoring and evaluation) Collect, analyze and present research information Develop a dissemination plan Monitor and evaluate your research project Over 200 researchers, academics, disease control program managers, policy-makers, health administrators, communication scientists and journalists contributed to test and evaluate the toolkit. Major funding was provided by USAID, with additional support from the Implementation Research Platform at the World Health Organization.

Carbon Forestry, who Will Benefit? Proceedings of Workshop on Carbon

Sequestration and Sustainable Livelihoods WestBow Press

A number of UN conventions and declarations (on the Rights of Indigenous Peoples, the Protection and Promotion of the Diversity of Cultural Expressions and the World Heritage Conventions) can be understood as instruments of international governance to promote democracy and social justice worldwide. In Indonesia (as in many other countries), these international agreements have encouraged the self-assertion of communities that had been oppressed and deprived of their land, especially during the New Order regime (1966-1998). More than 2,000 communities in Indonesia who define themselves as *masyarakat adat* or "indigenous peoples" had already joined the Indigenous Peoples' Alliance of the Archipelago (AMAN) by 2013. In their efforts to gain recognition and self-determination, these communities are supported by international donors and international as well as national NGOs by means of development programmes. In the definition of *masyarakat adat*, "culture" or *adat* plays an important role in the communities' self-definition. Based on particular characteristics of their *adat*, the asset of their culture, they try to distinguish themselves from others in order to substantiate their claims for the restitution of their traditional rights and property (namely land and other natural resources) from the state. The authors of this volume investigate how differently structured communities - socially, politically and religiously - and associations reposition themselves vis-à-vis others, especially the state, not only by drawing on *adat* for achieving particular goals, but also dignity and a better future. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use.
