German books in print Fischer Gustav Verlag GmbH & Company KG DANK is simply the very best marijuana, grown to perfection. DANK the book is a visual story of marijuana buds at their ripest, stickiest best. Ed Rosenthal refers to Subcools photographs as "Pot Porn." Author and photographer Subcool breeds for distinctive color, flavors, and highs.

His varieties come in unusual tones of red, pink and purple and the ripe buds glisten with trichome glands filled to capacity with intoxicating THC. Come share his passion and enjoyment of this amazing plant. *The Flatey Book* Addison-Wesley The Yearbook compiles the most recent, widespread developments of experimental and clinical research and practice in one comprehensive reference book.  Weder eine Trachealkanüle noch eine invasive Beatmung verhindern prinzipiell eine mündliche Kommunikation oder eine orale Nahrungs- und

Flüssigkeitsaufnahme. Sowohl Sprechen als auch Schlucken sind bei entsprechendem Trachealkanülenmanagement sehr oft wieder erreichbar. Das Buch richtet sich an Ärzte sowie an Therapie- und Pflegefachkräfte, die mit tracheotomierten Patientinnen und Patienten arbeiten oder sich in dieses Gebiet einarbeiten wollen. Es soll alle beteiligten Berufsgruppen in ihrem Bestreben unterstützen, möglichst viel Lebensqualität für die

Betroffenen auch mit Trachealkanüle zu erreichen und eine mögliche Dekanülierung mit einem schrittweisen, kontrollierten Vorgehen sicher und komplikationslos anzuvisieren. Wichtige Inhalte des Buches sind: Verschiedene Trachealkanülen-Arten und ihre Indikationen Trachealkanülenmanagement bei Spontanatmung Trachealkanülenmanagement bei invasiver Beatmung Patientenbeispiele Mit einem früh einsetzenden,

aktiven  
Trachealkanülenmanagem  
ent können oft schon auf  
der Intensivstation, auch  
bei invasiv Beatmeten,  
erste Erfolge in den  
Bereichen Sprechen und  
Schlucken erzielt werden.  
Folgekomplikationen

From the introductory.The  
Flateybook parchment is  
kept in the Royal Library  
in Copenhagen, where the  
writer has repeatedly  
seen and carefully  
examined it. It is one of  
the most beautiful  
manuscripts, on  
parchment, to be found  
anywhere. It is written by  
a master of penmanship,  
and the initials, as the  
reader will see, are rare  
examples of the penman's  
art. The other manuscript  
which tells us of the  
Vinland voyages is the so-  
called Hauksbook, giving  
the story of Thorfin

Karlsefne. This equally  
exquisite parchment is  
preserved in the so-called  
Arna-Magnæan collection  
in Copenhagen, which is a  
part of the Copenhagen  
University Library. The  
date of this manuscript is  
not older than 1299, or  
later than 1334. Hauk  
Erlendson died this latter  
year and there is  
substantial evidence that  
the manuscript was  
written partly by him and  
partly by his scribes, the  
parchment showing at  
least two other  
penmanships besides  
Hauk's, from whom an

autograph letter is still preserved. The Hauksbook takes its name from the powerful and distinguished Norwegian who lived in the early part of the 14th century. His father was Erlend Olafson the Strong, who had served as lawman and sysselman in Iceland, and whose death occurred about 1312. Hauk's mother was an Icelandic woman. In the year 1295 he was chosen lawman in Iceland, but about 1299 he moved to Norway where he held the office of lawman for a number of

years. In 1302 he became a member of the King's cabinet; in 1304 he was Knighted, and subsequently he made a number of voyages to Iceland on missions for King Hakon. In 1319 he was one of the Norwegian representatives who concluded a treaty of union between Norway and Sweden, making Magnus Erikson King of both countries. He died in Bergen, Norway, about the year 1334. This Hauk Erlendson took a deep interest in Norse history and literature, and as a

scholar he rendered most valuable service by making excellent and highly critical copies of laws and Sagas. Some of these are still extant in the so-called Hauksbook preserved in the Arne-Magnæan department of the University Library in Copenhagen. This choice parchment contains the Landnamabok, the Kristnisaga, the Saga of Thormod Kolbrunarskald, the Thorgeirs Saga, parts of the Skjoldunga Saga and of the Trojamama Saga, a Norse version of Merlin's Prophecies and,

what is of special interest in this connection, the account we give in this volume in facsimile of Thorfin Karlsefne's voyage to Vinland. It will thus be seen that this precious manuscript dates back to the beginning of the 14th century. Publication of these thoroughly authenticated documents, with translations, must compel acknowledgment of the truth of the claim that during the 10th and 11th centuries Norsemen discovered and visited a great extent of the eastern coasts of North

America. These documents will doubtless also lead to the conviction that for four centuries, immediately following the discovery, intercourse between Greenland, Iceland and Vinland was never entirely discontinued. The main fact is certain and undisputable. On the other hand, there are in them, as well as in all other ancient writings, certain portions of the narrative which are obscure, and which it will devolve upon future scholars to clear up. On

this account we think we render a very important service in publishing - the original sources of information, viz., the ancient manuscripts themselves, so that all may have the opportunity to consult them and to form their judgment as to the accuracy of the interpretations given. The evidence presented in this work proves beyond dispute that the coast of North America was discovered in the latter part of the 10th century, immediately after the discovery and settlement

of Greenland by the Norsemen, and that this coast was visited repeatedly by men in the 11th century, and likewise by colonists and exploring expeditions in the 12th and 14th centuries.

Pharmacological and clinical research on nitrates continues to be of growing interest in many centers. This is surprising in view of the fact that their favorable effects in angina pectoris were described by Brunton and

by Murrell in the Lancet more than 100 years ago. As expected, a host of new information has been collected since the two previous symposia on nitrates held in Stockholm in 1975 and Berlin in 1978. New insights were gained into the pharmacology, pharmacokinetics and pharmacodynamics of nitrates, as well as into their clinical effects in acute and chronic ischemic heart diseases and in severe congestive heart failure. Relatively little progress, however,

was observed in research into the basic action of nitrates. Although most investigators agree that intracellular sequestration of calcium is probably the main mechanism by which nitrates lead to the reduction of vascular smooth muscle tone, the exact site of their action still remains undefined. In contrast, dose-dependent differences in venous and arteriolar tone have long been clearly established. Treatment was again in the main stream of discussion. The question of tolerance following

long-term administration was discussed in depth and the term "pseudotolerance" was introduced to describe the adaptation of the body's circulatory system to chronic vasodilation. This is especially important in long term prophylactic antiischemic treatment in stable, as well as in unstable angina pectoris (i.e. during increased vasomotor tone - spasm). Advanced Practice Nursing Springer This is part of an extremely successful trilogy which uses a visual

approach to illustrate the anatomy, physiology and mechanics of the joints. It presents, in double page spreads, clear and simple diagrams that have the minimum of text. *International Handbook of Research in Professional and Practice-based Learning* Academic Press In his newest release, Flow Learning®, Joseph Bharat Cornell shares a transformative learning process that empowers participants to awaken their higher human qualities through direct experiences in nature.

Flow Learning provides the essential ingredients for true learning, as well as a recipe for the inner transformation that every educator strives to bring their students. Since the onset of the COVID-19 pandemic, education and the classroom settings are undergoing dramatic changes. Flow Learning helps us utilize the one thing accessible to each of us: nature. This book offers living examples, activities, and points of reflection to help the reader understand how to use these concepts for

best effect-whether you're a parent, teacher, group facilitator, or nature enthusiast. Cornell's Sharing Nature® books have "sparked a worldwide revolution in nature education," and have been published in twenty-seven languages and sold over a million copies. After the success of his award-winning books Sharing Nature and Deep Nature Play, Flow Learning completes his earlier works with an in-depth teaching system that awakens us to our higher potential by

experiencing the joy of being in nature.

'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership

Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

 This book is a clinical manual that covers the whole spectrum of swallowing and its disorders. It starts with physiology of swallowing, pathophysiology of disordered deglutition, diagnostic methods (clinical and instrumental) and ends with an in-depth's and up-to-date

presentation of current treatment options. The clinically most relevant topics of dysphagia management on the stroke unit and the intensive care unit are dealt with in separate chapters. Also the closely intertwined issue of nutritional management is specifically addressed. Most importantly, the book covers all obligatory topics of the Flexible Endoscopic Evaluation of Swallowing (FEES)-curriculum, an educational initiative that started in Germany in

2014 and is currently being extended to other European and non-European countries. The book is richly illustrated and an online video section provides a number of typical patient cases. FEES is probably the most commonly chosen method for the objective assessment of swallowing and its disorders. It is used in stroke units, intensive care facilities, geriatric wards but also in rehabilitation clinics and within dedicated outpatient services. This

book on neurogenic dysphagia therefore addresses a wide range of different medical disciplines, such as neurologists, geriatricians, intensive care physicians, rehabilitation physicians, gastroenterologists, otolaryngologists, phoniatrists and also speech-language pathologists.
