An immersive journey into the underwater world that holds transformative lessons for us all - featuring an introduction by Jane Goodall Craig Foster and Ross Frylinck regularly dive together in the awe-inspiring kelp forests off South Africa, without wetsuits or oxygen tanks. Craig had dived this way for years, including alongside the octopus that inspired My Octopus Teacher. In Ross, he found a kindred spirit, someone who also embraced the ancient methods of acclimating his body

to frigid waters, but whose eyes had not yet adjusted to the transcendent wonder Craig saw each time they dove. In the heart-wrenching stories that make up this unforgettable book, we swim alongside Ross as he grows from sceptic to student of the underwater wild. And in the revelatory marine science behind the stunning photos, we learn how to track sea hares, cuttlefish and limpets, and we witness strange new behaviours never before documented in marine biology. We realise that a whole world of wonder, and an innate wildness within us all, emerge anew when we simply observe. My Octopus Teacher has captivated millions who long to connect with the natural world. Now, with Underwater Wild, the divers behind the film reveal a new vision of the sea, one full of wonder,

insights into marine biology and life-changing teachings for even the most land-bound of us.

Undrowned is a book-length meditation for social movements and our whole species based on the subversive and

transformative guidance of marine mammals. Our aquatic cousins are queer, fierce, protective of each other, complex, shaped by conflict, and struggling to survive the extractive and militarized conditions our species has imposed on the ocean. Gumbs employs a brilliant mix of poetic sensibility and naturalist observation to show what they might teach us, producing not a specific agenda but an unfolding space for wondering and questioning. From the relationship between the endangered North Atlantic Right Whale and Gumbs's Shinnecock and enslaved ancestors to the ways echolocation changes our understandings of "vision" and visionary action, this is a masterful use of metaphor and natural models in the service of social justice.

An NPR Best Book of 2018! Some people can do their homework. Some people get to have crushes on boys. Some people have other things they've got to do. Seventh-grader Zoey has her hands full as she takes care of her much younger siblings after school every day while her mom works her shift at the pizza parlor. Not that her mom seems to appreciate it. At least there's Lenny, her mom's boyfriend—they all get to live in his nice, clean trailer. At school, Zoey tries to stay under the radar. Her only friend Fuchsia has her own issues, and since they're in an entirely different world than the rich kids, it's best if no one notices them.

Zoey thinks how much easier everything would be if she were an octopus: eight arms to do eight things at once.

Incredible camouflage ability and steady, unblinking vision. Powerful protective defenses. Unfortunately, she's not totally invisible, and one of her teachers forces her to join the debate club. Even though Zoey resists participating, debate ultimately leads her to see things in a new way: her mom's relationship with Lenny, Fuchsia's situation, and her own place in this town of people who think they're better than her. Can Zoey find the courage to speak up, even if it means risking the most stable home she's ever had? This moving debut novel explores the cultural divides around class and the gun debate through the eyes of one girl, living on the edges of

society, trying to find her way forward.

"This is a full biography of Charles Williams, an extraordinary and controversial figure who was a central member of the Inklings--the group of Oxford writers that included C.S. Lewis and J.R.R. Tolkien. Charles Williams--novelist, poet, theologian, magician and guru--was the strangest, most multi-talented, and most controversial member of the group. A charismatic personality, he held left-wing political views, and believed that the Christian churches had dangerously undervalued sexuality. To redress the balance, he

developed a "Romantic Theology," aiming at an approach to God through sexual love. He became the most admired lecturer in wartime Oxford, influencing a generation of young writers before dying suddenly at the height of his powers" --

Octopus does for the creature what Helen Macdonald's *H Is for Hawk* did for raptors." —New Statesman, UK "One of the best science books of the year." —Science Friday, NPR Another New York Times bestseller from the author of *The Good Good Pig*, this "fascinating...touching...informative...entertaining" (The Daily Beast) book explores the emotional and physical world of the octopus—a surprisingly complex, intelligent, and spirited creature—and the remarkable connections it makes with humans. In pursuit of the wild, solitary, predatory octopus, popular naturalist Sy Montgomery has practiced true immersion journalism. From New England aquarium tanks to the reefs of French Polynesia and the Gulf of Mexico,

she has befriended octopuses with strikingly different personalities—gentle Athena, assertive Octavia, curious Kali, and joyful Karma. Each creature shows her cleverness in myriad ways: escaping enclosures like an orangutan; jetting water to bounce balls; and endlessly tricking companions with multiple “sleights of hand” to get food. Scientists have only recently accepted the intelligence of dogs, birds, and chimpanzees but now are watching octopuses solve problems and are trying to decipher the meaning of the animal’s color-changing techniques. With her “joyful passion for these intelligent and fascinating creatures” (Library Journal Editors’ Spring Pick), Montgomery chronicles the growing appreciation of this mollusk as she tells a unique love

story. By turns funny, entertaining, touching, and profound, *The Soul of an Octopus* reveals what octopuses can teach us about the meeting of two very different minds.

The remote and lush island of Ikaria in the northeastern Aegean is home to one of the longest-living populations on the planet, making it a “blue zone.” Much of this has been attributed to Ikaria’s stress-free lifestyle and Mediterranean diet—daily naps, frequent sex, a little fish and meat, free-flowing wine, mindless exercise like walking and gardening, hyper-local food, strong friendships, and a deep-rooted disregard for the clock. No one knows the Ikarian lifestyle better than Chef Diane Kochilas, who has spent

much of her life on the island. Part cookbook, part travelogue, Kochilas's Ikaria is an introduction to the food-as-life philosophy and a culinary journey through luscious recipes, gorgeous photography, and captivating stories from locals. Capturing the true spirit of the island, Kochilas explains the importance of shared food, the health benefits of raw and cooked salads, the bean dishes that are passed down through generations, the greens and herbal teas that are used in the kitchen and in the teapot as "medicine," and the nutritional wisdom inherent in the ingredients and recipes that have kept Ikarians healthy for so long. Ikaria is more than a cookbook. It's a portrait of the people who have achieved what so many of us yearn for: a fuller, more

meaningful and joyful life, lived simply and nourished on real, delicious, seasonal foods that you can access anywhere.

"Interest in this dynamic writer was wide and sustained, but Frank Norris and his family did biographers no favors. Norris burned most of his correspondence, the 1906 San Francisco earthquake and fire devoured more, and his brother and widow dispersed his surviving papers as gifts. As a result, it was thought impossible to assemble enough material to surpass the single existing biography, published in 1932. Authors Joseph R. McElrath Jr. and Jesse S. Crisler, acknowledged as the leading experts on Norris, have spent over thirty years overcoming these obstacles, devotedly

amassing the material necessary to at last fashion a truly full-scale portrait of the artist. This is the first complete biography of this centrally important American novelist to appear in seventy years, and anyone familiar with the breezier existing accounts of the man and hungering for the real story will agree that Frank Norris, *A Life* was worth the wait."--BOOK JACKET.

For years, major film studios have licensed products related to their most popular films; video game spin-offs have become an important part of these licensing practices. Where blockbuster films are concerned, the video game release has become the rule rather than

the exception. In *Hollywood Gamers*, Robert Alan Brookey explores the business conditions and technological developments that have facilitated the convergence of the film and video game industries. Brookey treats video games as rhetorical texts and critically examines several games to determine how specific industrial conditions are manifest in game design. Among the games (and films) discussed are *Lord of the Rings*, *The Godfather*, *Spider-Man*, and *Iron Man*.

—Booklist Learn all about Inky the Octopus, an international sensation known for escaping from the New Zealand aquarium in April 2016, in this fascinating picture book from National Book Award nominee and octopus expert Sy Montgomery. Inky had been at the New Zealand aquarium since 2014 after being taken in by a fisherman who found him at sea. Inky had been getting used to his new environment, but the staff quickly figured out that he had to be kept amused or he would get bored. Then one night in 2016 Inky, about the size of a basketball, decided he’d had

enough. He slithered eight feet across the floor and down a drainpipe more than 160 feet long to his home in the sea. Acclaimed author Sy Montgomery reminds readers that Inky didn’t escape—but instead, like the curious animal he is, wanted to explore the rest of the vast ocean he called his home. *The Kraken and the Colossal Octopus* Page Street Publishing
