### **Muscle, tendon, joint and bone disorders** Asian Racing Federation

Strategic Management for Hospitality and Tourism is a vital text for all those studying cutting edge theories and views on strategic management. Unlike others textbooks in this area, it goes further than merely contextualizing strategic management for hospitality and tourism, and avoids using a prescriptive, or descriptive approach. It looks instead, at the latest in strategic thinking and theories, and provides critical and analytical discussion as to how and if these models and theories can be applied to the industry, within specific contexts such as culture, profit and non-profit organizations. This title also provides online support material for tutors and students, in the form of guidelines for instructors on how to use the textbook, PowerPoint presentations and case studies plus additional exercises and web links for students.

### **Hong Kong 2005** Routledge

This book addresses in detail a range of issues in connection with preparing individuals with disabilities or other special needs for gaining employment and planning a career path beyond school. It presents strategies for personnel preparation, parent education, effective programs for career development and transitions, policies and policy research, and useful tools for assessment and intervention. The clear explanations of essential theories, research findings, policies, and practices for career development ensure that readers gain a deeper understanding of all the issues involved. Most importantly, they will learn several strategies that can be used to prepare students for employment within global and Asia-Pacific regional contexts.

### **Pragmatic Philanthropy** Strategic Management in the International Hospitality and Tourism Industry

In Decision Modelling And Information Systems: The Information Value Chain the authors explain the interrelationships between the decision support, decision modelling, and information systems. The first two parts of the book focus on the interdisciplinary decision support framework, in which mathematical programming (optimization) is taken as the inference engine. The role of business analytics and its relationship with recent developments in organisational theory, decision modelling, information systems and information technology are considered in depth. Part three of the book includes a carefully chosen selection of invited contributions from internationally-known researchers. These contributions are thought-provoking and cover key decision modelling and information systems issues. The final part of the book covers contemporary developments in the related area of business intelligence considered within an organizational context. The topics cover computing delivered across the web, management decision-making, and socio-economic challenges that lie ahead. It is now well accepted that globalisation and the impact of digital economy are profound; and the role of e-business and the delivery of decision models (business analytics) across the net lead to a challenging business environment. In this dynamic setting, decision support is one of the

few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges.

The International Narcotics Control Strategy Report (INCSR) is an annual report by the Department of State to Congress prepared in accordance with the Foreign Assistance Act. The 2011 report describes the efforts of key countries to attack all aspects of the international drug trade in Calendar Year 2010. Volume I covers drug and chemical control activities. Contents: Introduction; Policy and Program Developments; U.S. Government Assistance; Chemical Controls; Country Reports. This is a print on demand edition of an important, hard-to-find report.

### **Annual Report on the Activities of the Independent Commission Against Corruption**

Springer

The Handbook, written by the Asian Racing Federation Council on Anti-illegal Betting and Related Financial Crime, aims to (1) highlight the risks to the integrity of racing and other sports from illegal betting-related sports corruption, and (2) provide practical guidance to administrators and other key stakeholders to mitigate against and combat such corruption. It has been written by the Council members, a group of experts from horse racing and sports integrity management, law enforcement, sports law, and international government relations. The Asian Racing Federation is a regional federation comprising 28 racing authorities and racing-related organisations, with a wide geographic spread from New Zealand to South Africa. Among its core objectives is the promotion of integrity in the sport of horse racing. The Asian Racing Federation Anti-Illegal Betting Taskforce was established in 2017 and now comprises 14 members from organisations engaged in horse racing and sports integrity, law enforcement, the UNODC, and academia. In October 2020, the task force was renamed as the Asian Racing Federation Council on Anti-illegal Betting & Related Financial Crime whose purpose is to foster and enhance international cooperation among horse racing operators, regulators, intergovernmental organisations and government agencies in order to better combat the threat of illegal betting and other financial crimes to horse racing integrity in particular, and sport in general.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

### Computerworld Springer Nature

This book shows how the resources invested in facilities can be made to work more efficiently in the pursuit of institutional objectives. It is based on the proceedings of an international workshop that examined current trends in tertiary education policy.

### *Issues in Tissue Engineering and Transplant and Transfusion Medicine: 2011 Edition* Routledge

In China, the central government has the political will to control organized crime, which is seen as a

national security threat. The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments. The development of prostitution, underground gambling and narcotics production has become so serious that the central government has to rely on anti-crime campaigns to combat these "three evils". This book explores the specific role of government institutions and agencies, notably the police, in controlling organised and cross-border crime in Greater China. Drawing heavily on original empirical data, it compares the both the states of the People's Republic of China and Taiwan, as well as city-states Hong Kong and Macao. This region has become increasingly economically integrated, and human interactions have been enhanced through improved trade relations, tourism, and increased individual freedom. The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti-crime campaigns. It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political-criminal nexus. Focusing on regime capacity in crime control, regime autonomy from crime groups, and regime legitimacy in the fight against organized crime, this thought-provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly.

Good Practices in Addressing Illegal Betting: A Handbook for Horse Racing and Other Sports to Uphold Integrity DIANE Publishing

This book is open access under a CC BY 4.0 license. This cutting edge text considers how Asian philanthropists and charitable organizations break with Western philanthropic traditions and examines the key traits and trends that make social investment in Asia unique. Based on 30 case studies of excellent social delivery organizations (SDOs) and social enterprises as well as interviews with ultra-high net-worth individuals throughout Asia, this book examines which characteristics and strategies lead to successful philanthropy and social delivery organizations. Providing evidence based findings on philanthropy, social investment and social delivery organizations in Asia, this book provides invaluable resources for those wishing to deepen their understanding of the sector and what this means for political and economic development in the region.

Liberal Arts Education and Colleges in East Asia ScholarlyEditions

Barbara Mittler's book is the first comprehensive monographic study of China's New Music written in a Western language. It deals with two key points of contention: the effects of politics on the development of Chinese New Music, and the importance of China's indigenous musical traditions for the development of her New Music. In many ways, it is a handbook to New Chinese Music as it provides biographical and musicological sketches of the greater number of China's composers. As a reference work it will thus be of interest to libraries as well as to musicologists and music impresarios. The book is unique as a comparative study of New Chinese Music under three different political systems. Its conclusions, the discovery of (and explanations for) inherent similarities in those three New Musics will be of interest to sinologists in the field of politics and cultural studies.

**Management of lameness causes in sport horses** Univ of California Press

Chinese societies have undergone a tremendous amount of social, political, and economic change,

which have been a catalyst for substantial shifts in fundamental structures within Chinese families. This edited collection focuses on the continuities and changes in gender and inter-generational relations of Chinese families in Greater China.

**CRM** Wageningen Academic Publishers

This book discusses liberal arts education and liberal arts colleges in the context of East Asia, specifically focusing on Japan, China and S. Korea where it has become an emerging issue in higher education in recent years. It first explores the development, concepts and challenges of liberal arts education and liberal arts colleges in East Asia. It then delineates the implications of the best practices of selected liberal arts colleges inside and outside East Asia, and offers policy and pedagogical guidelines for the future of liberal arts colleges and programs in East Asia and beyond.

Social Unrest and the Poverty Problem in Hong Kong Hong Kong University Press

Suicide is one of the most personal yet one of the most complex acts people can engage in. It continues to be a major global public health problem with an estimated 800,000 deaths annually. Suicide prevention is an important target in the United Nations Sustainable Development Goals (SDGs) for 2030, which aim to reduce premature mortality from noncommunicable diseases by one-third. Suicide is a global problem, but what differences are there in the challenges faced and the solutions found regionally? Written by leading experts, the nine chapters of this volume provide a clear outline of the major milestones and achievements so far in six different geographical regions using the data collated by the International Association for Suicide Prevention (IASP) and the WHO Department of Mental Health and Substance Abuse, as well as information on the recent progress in the development and implementation of national suicide prevention programs in different countries. In two concluding chapters, the evidence base and best practice of suicide prevention programs are reviewed, as well as the future directions for suicide prevention at the global level. This book is essential reading for all those involved in suicide research and prevention as well as public health policy and epidemiology who want to keep up-to-date with the latest global developments.

**1900-1997** John Wiley & Sons

A solid understanding of how banks operate is crucial to grasp the functioning of modern society. Banks are an intrinsic part of business, finance, and everyday life. Modern banking is regulated by a sophisticated set of laws and regulations that are constantly evolving. Banking Law and Practice from the Hong Kong Institute of Bankers outlines and explains these laws and regulations clearly and in detail. This regulatory framework has a deep impact on banks, bankers, and anyone that deals with them, which is the overwhelming majority of society. This high level of impact makes Banking Law and Practice an important book as well as a necessary and authoritative reference for industry professionals, students, and the public at large. Banking Law and Practice discusses a range of topics that have a direct bearing on the day-to-day operations of banks, from contracts to how to ensure safe and secure lending. It examines the development and current state of banking legislation and regulation and facilitates bankers and their institutions to shape their practice to meet all the necessary legal and regulatory requirements. Students, industry professionals, and the public at large will welcome the thorough and clear explanations of the legal and regulatory framework in which banks operate. This book is essential reading for candidates studying for the HKIB Associateship Examination and anyone else seeking expert knowledge of the legal and

regulatory structure affecting banks in Hong Kong. Topics covered in this book include: Contractual Relationships Code of Banking Practice Money Laundering Negotiable Instruments Law Related to Securities Bankruptcy and Insolvency

*Hong Kong 2007* Emerald Group Publishing

'Strategic Management in the Asia Pacific' assembles an international team of world-famous practitioners and experts to cover the most significant aspects of doing business in the Asia Pacific. Recent developments such as the domino declines in the world financial markets clearly demonstrate that: \* we live, and perceive ourselves as living, in an interdependent world where business developments in Hong Kong can affect those in New York, London or Sao Paulo \* understanding how to manage effectively in the Asia Pacific positively affects multinationals' profits and survival. 'Strategic Management in the Asia Pacific' explores how to manage effectively and profitably in the Asia Pacific and identifies and interprets important environmental characteristics and key stakeholders' influences. Sources for up-to-the-minute information to make strategic decisions are also indicated. Contributors include: Kam-Hon Lee, Dean of Business School, Chinese University of Hong Kong (who advised Coca-Cola's entry into China); Mike Hobday, University of Sussex (who advises the Malaysia Government on its 2020 policy); Ingo Walter, Stern School of Business, New York University (who advises several major governments and corporate institutions on international banking and finance); Chin Tiong Tan, National University of Singapore (who advises Singapore Airlines among other major companies); Kong Yam Tan, National University of Singapore (who served as Singapore's Chief Economist and is currently its Chair to APEC) and Ian Marsh, Professor of International Business, Australian Graduate School of Management. Usha Haley was formerly Visiting Professor at the Managing Business in Asia Programme, Australian National University, Canberra. She also serves as a consultant on issues concerning strategic management, business-government relations and foreign direct investment for several multinational corporations in North America, Australasia, Europe and Asia. Examines strategic management and organizational change in Asia Pacific from a number of different perspectives: local governments; local companies and MNCs. No other book covers this topic with such range and scope. Quality contributors.

Strategic Language Learning John Wiley & Sons

The Hong Kong Jockey Club (HKJC) Veterinary Departments have enabled an environment suitable to set an international benchmark on a project concept to enhance the welfare of racehorses, based on research using extensive and detailed data collection within an integrated framework. Retrospective analysis of data collected over the past several years has been made available. The approach outlined in this book has two broad objectives. The first is to investigate outcomes of interest using data which has already been collected. Outcomes of interest are likely to include (though not be limited to), variables that influence injury, retirement or performance. The second broad objective is to extend the approach to a more general assessment of the usefulness of different data types and different variables, and the assessment of data collection, collation, analysis and reporting methodology, as well as the development of intervention strategy. This book concludes with a philosophical view point on the veterinary management of thoroughbred racing injuries in which a "think-out-of-the-box" concept in assessing the risk of racehorse injuries is discussed. One outcome of this is an integrated technology approach for tracking horse performance, recently developed by

Cambridge Design UK. The integrated technology (flight deck recorder concept) for monitoring trackwork and race performance of racehorses can allow a standardised review of detailed training data and biometric readings from direct measurements of individual horse, to assess the progress of performance and the effect of track conditions. The development of integrated performance tracking technology is mission critical for the worldwide racing industry to optimize horse welfare, safety and racing performance, as well as to enhance the integrity of racing.

Insights and Inspirations from 20 Innovators CSIS

Key aspects on the diagnosis and management of lameness caused by muscle, tendon, joint and bone related disorders in sport horses will be presented in this book. Topics included are among others: Deep digital flexor tendon lesions in the fetlock region: Diagnosis. Results of the treatment of the causes of distension of the deep digital flexor tendon. Superficial digital flexor tendonitis: Diagnosis. Management of superficial digital flexor tendonitis. Proximal suspensory desmitis in fore- and hindlimbs: Diagnosis. Management of proximal suspensory desmitis in fore- and hindlimbs. How are tendon injuries tackled in human athletes? Osteoarthritis & traumatic joint disease: Diagnosis. Management of osteoarthritis & traumatic joint disease. How is osteoarthritis & traumatic joint disease managed in human athletes? Monitoring training and disease of Thoroughbreds in the UK. Is there science behind complementary modalities therapy of tendon & ligament injury?

**Possibilities and Challenges in the Global Age** Routledge

The 1997 transfer of sovereignty over Hong Kong from British colonial rule to a Special Administrative Region (SAR) under the People's Republic of China captured America's worried attention. Yet more than 10 years after the handover, and despite real challenges to its economic, political, and security systems, Hong Kong has retained its vibrancy and openness based on the rule of law and a free and competitive economy. There is no question that during this period Hong Kong has been challenged. Economically, it has faced a currency crisis, a real estate bubble that burst, and a deep recession. Politically, democracy activists have accused the government of dragging its feet in pushing for universal suffrage as promised by China and Britain and enshrined in the Basic Law, Hong Kong's mini-constitution. It survived major public health threats, including an avian flu outbreak and the deadly devastation of the SARS virus. And its port, one of the largest and busiest in the world, has had to deal with the challenges of transportation security in the face of global terrorism. Instead of buckling under the pressure of these crises, Hong Kong has proven its resilience, adaptability, and creativity. Today, Hong Kong remains an open and pluralistic society, with an effective and pragmatic government, a respected and independent legal system, a free press, and a politically active populace. Many in the United States focus elsewhere only when those places have problems, not when they are doing well. But Hong Kong's achievements should be examined and celebrated. To be sure, Hong Kong will face challenges and even crises in the future. Yet the lessons of the past decade will serve it well. This volume tells Hong Kong's success story from the viewpoints of noted U.S. and Hong Kong scholars, economists, trade officials, and security experts. It offers provocative perspectives on Hong Kong's complicated political and economic development, changing identity, and complex relationship with the rest of China, as well as insights into what lies ahead for this vibrant city in an era of globalization.

**Making Hong Kong** Hogrefe Verlag

This insightful book provides a comprehensive survey of urban development in Hong Kong since 1841. Pui-yin Ho explores the ways in which the social, economic and political environments of different eras have influenced the city's development. From colonial governance, wartime experiences, high density development and the return to Chinese sovereignty in 1997 through to contemporary challenges, this book explores forward-looking ideas that urban planning can offer to lead the city in the future. Evaluating the relationship between town planning and social change, this book looks at how a local Hong Kong identity emerged in the face of conflict and compromise

between Chinese and European cultures. In doing so, it brings a fresh perspective to urban research, providing historical context and direction for the future development of the city. Hong Kong's urban development experience offers not only a model for other Chinese cities but also a better understanding of Asian cities more broadly. Urban studies scholars will find this an exemplary case study of a developing urban landscape. Town planners and architects will also benefit from reading this comprehensive book as it shows how Hong Kong can be taken to the next stage of urban development and modernisation.
