*Publishers' Weekly* Delmar Thomson Learning

In *The Postmodern Animal*, Steve Baker explores how animal imagery has been used in modern and contemporary art and performance, and in postmodern philosophy and literature, to suggest and shape ideas about identity and creativity. Baker cogently analyses the work of such European and American artists as Olly and Suzi, Mark Dion, Paula Rego and Sue Coe, at the same time looking critically at the constructions, performances and installations of Robert Rauschenberg, Louise Bourgeois, Joseph Beuys and other significant late twentieth-century artists. Baker's book draws parallels between the animal's place in postmodern art and poststructuralist theory, drawing on works as diverse as Jacques Derrida's recent analysis of the role of animals in philosophical thought and Julian Barnes's best-selling *Flaubert's Parrot*.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and

museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Mayfield Bunny, the new novel by Herbert Feldman, author of *Broken Record*, is the story of an obsessional search, architected in fantasy and self-delusion. The novel's protagonist, Dr. Egon Chernel, has dedicated his unruly, anarchic life to the elimination of human blindness on Planet Earth: Chernel's astonishing scientific miracle, source of a certain Nobel Prize, depends upon his uncovering and interviewing Mayfield Bunny, a being of unknown species and image. Chernel gathers a small band of followers, needy individuals, in search of their own slot in society, around him. Chernel, chosen as savior of the sightless, tyrannically drives his disciples through his fanatical, lunatic hunt for his Holy Grail, Mayfield Bunny. Mayfield Bunny is absurd, surreal, but the book is, ultimately, a tragic rendering of the lethal price one pays for a life lived in fantasy and uncompromising delusion. You won't easily forget Egon Chernel and his acolytes in their quest for the mystery and essence of Mayfield Bunny.

An exquisite paper art book featuring quilling techniques for cards and gifts. With a focus on simple, elegant projects, *The Art of Paper Quilling* offers paper crafters a complete technique guide along with step-by-step project ideas for making beautiful framed pieces, cards, gifts, and more. The designs are all built upon simple rolled coils of paper that when grouped together, form intricate flowers, graceful butterflies, and delicate scrollwork. Quilled designs can be framed or used to embellish greeting cards, books and journals, and many types of simple paper structures. Claire Sun-ok Choi is an expert paper artist who has influenced the revival of this fanciful art form with her inspiring exhibits and internationally known books.
