This book examines how

the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, commonly known as The New York Convention, has been understood and applied in [insert number] jurisdictions, including virtually all that are leading international arbitration centers. It begins with a general report surveying and synthesizing national responses to a large number of critical issues in the Convention's interpretation and application. It is followed

by national reports, all of which are organized in accordance with a common questionnaire raising these critical issues. Following introductory remarks, each report addresses the following aspects of the Convention which include its basic implementation within the national legal system; enforcement by local courts of agreements to arbitrate (including grounds for withholding enforcement), recognition and enforcement of foreign awards by local courts

under the Convention (including grounds for denying recognition and enforcement), and essential procedural issues in the courts' conduct of recognition and enforcement. Each report concludes with an overall assessment of the Convention's interpretation and application on national territory and recommendations, if any, for reform. The New York Convention was intended to enhance the workings of the international arbitral system, primarily

by ensuring that arbitral awards are readily recognizable and enforceable in States other than the State in which they are rendered, subject of course to certain safeguards reflected by the Convention's limited grounds for denying recognition or enforcement. It secondarily binds signatory states to enforce the arbitration agreements on the basis of which awards under the Convention will be rendered. Despite its

exceptionally wide adoption and its broad coverage, the New York Convention depends for its efficacy on the conduct of national actors, and national courts in particular. Depending on the view of international law prevailing in a given State, the Convention may require statutory implementation at the national level. Beyond that, the Convention requires of national courts an apt understanding of the principles and policies that underlie the Convention's various

provisions. Through its in-depth coverage of the understandings of the Convention that prevail across national legal systems, the book gives practitioners and scholars a much-improved appreciation of the New York Convention "on the ground."

Boating Kluwer Law International B.V. Now in its third edition, Commonwealth Caribbean Business Law continues to break away from the traditional English approach of treating business law primarily as

the law of contract and agency. Taking a panoramic view, it explores the foundation of various legal systems before examining areas of legal liability that affect business activities. These include areas such as contract law, tort law, criminal law, agency and internet law which present significant challenges confronting the business sector. The book primarily targets the development of business law principles in several Caribbean Commonwealth jurisdictions but, where

appropriate, also embraces the jurisprudence of other Commonwealth nations, such as the United Kingdom, Canada and Australia. It also explores the United States as a non-Commonwealth jurisdiction, given the increasing importance in the Caribbean of judicial pronouncements relating to internet law from this territory. Using excerpts from key judgments, the book allows students, particularly those with a non-legal background, to understand key legal

principles for business as presented by the judiciary and draws parallels between legal theory and business practice.

 This book provides a comprehensive commentary on the UNCITRAL Model Law on International Arbitration. Combining both theory and practice, it is written by leading academics and practitioners from Europe, Asia and the Americas to ensure the book has a balanced international coverage. The book not only provides an article-by-article critical analysis,

but also incorporates information on the reality of legal practice in UNCITRAL jurisdictions, ensuring it is more than a recitation of case law and variations in legal text. This is not a handbook for practitioners needing a supportive citation, but rather a guide for practitioners, legislators and academics to the reasons the Model Law was structured as it was, and the reasons variations have been adopted.

The scope and importance of International Commercial Arbitration (ICA) has expanded exponentially in the last

few decades and has become the natural and logical method to resolve international business and economic disputes. This collective work captures the development of ICA from different perspectives and uniquely brings together the ideas, suggestions and perspectives of in-house counsel as the most important users of ICA, along with outside counsel, arbitrators themselves, and major arbitration organizations who all help provide the service. Most, if not all, of

the contributing authors have served as counsel or arbitrator in arbitrations and have further contributed, through their writings, teachings or activities in arbitral and other institutions, to the evolution of ICA covered by this collective work. Accordingly, International Commercial Arbitration Practice: 21st Century Perspectives is an indispensable tool for the reader-practitioner, arbitrator, academic, magistrate or student-not only to obtain useful general information on

ICA practice today but to gain insightful views as to the influence of this institution in the settlement of international commercial disputes in specific economic areas, industries and commercial activities. International Commercial Arbitration Practice: 21st Century Perspectives brings the process alive and provides the reader with a useful practice guide whether he or she represents a client participating in an international commercial

arbitration, is in-house counsel for a company considering arbitration as a possible method of dispute resolution, or is an arbitrator with cases at hand. The book is organized by Parts which contain thematically related chapters. Part I deals with an overview of key elements in ICA practice and includes chapters on how arbitration is conducted under different legal systems such as common law, civil law, and shari'a law, as well as a chapter on cultural issues in

international arbitration. Part II contains geographical regional overviews covering most regions of the world (Western Europe, Russia/NIS countries, Asia (particularly China & Hong Kong and the Indian Subcontinent), Middle East & North Africa, Latin America, the U.S., Canada, and Australia & New Zealand. Part III includes individual industry sector views of how ICA is conducted in individual industry and business sectors such as oil & gas, LNG, mining,

construction, telecommunications, satellite communications, intellectual property, sports, banking & finance, insurance & reinsurance, securities, shipping & maritime, corporate shareholder and bankruptcy settings. These chapters are highly instructive because many of them were written by current or former in-house counsel in these industries or, in some cases, by outside counsel who focus on these industries. Part IV of the book describes recent

trends at several major global commercial arbitration institutions such as the ICC, ICDR, LCIA, CPR and WIPO. Part V deals with questions of how technology has been changing ICA practice in recent years, including chapters relating to the use of technology by some major arbitral institutions, videoconferencing in ICA, and online arbitration of internet domain name and e-commerce cases.
