KYLEIGH HILLARY

The Defence Penguin UK

At Arsenal, the club where he won the FA Cup three times, Per Mertesacker was affectionately called the 'Big Friendly German.' Standing at 6ft 6in, he was the defender who took fitness so seriously that he invested ten per-cent of his annual salary on personal therapists. His endurance would help him in a decade- long career with the German national team which culminated in him lifting the World

Cup in 2014. In his autobiography, Mertesacker reveals the story of that summer in Brazil, explaining the tactical tricks of Jogi Low as well as the motivational arts of Arsene Wenger. He asks himself to what extent talent plays a role in football, having been a youth who was told he had too little of it until he was promoted by Ralf Rangnick at Hannover 96. Now the academy manager at Arsenal, Mertesacker details what it really takes to become a success in the game he started playing when he was just four years old.

Cicero (106-43BC) was the most brilliant orator in Classical history. Even one of the men who authorized his assassination, the Emperor Octavian, admitted to his grandson that Cicero was: 'an eloquent man, my boy, eloquent and a lover of his country'. This new selection of speeches illustrates Cicero's fierce loyalty to the Roman Republic, giving an overview of his oratory from early victories in the law courts to the height of his political career in the Senate. We see him sway the opinions of the mob and the most powerful men in Rome, in favour of Pompey the Great and against the conspirator

Catiline, while The Philippics, considered his finest achievements, contain the thrilling invective delivered against his rival, Mark Antony, which eventually led to Cicero's death.

The Four Imams

HarperCollins

In this unique work of Ibn Taymiyah, his primary aim is to present cogent answers to the following questions as he displays humble deference towards his predecessors: ■ Why did the distinguished jurists, notably the Four Imams of early Muslim history, differ? ■ Why do some of their views apparently contradict authentic scriptural texts? ■ Why do their followers seem to prefer their opinions, even when they outwardly contradict

sound prophetic traditions? He begins his work by outlining three explanations as to why the eponymous four Imams sometimes contravened the import of sound prophetic traditions. He then proceeds to explicate ten things prompting them to adopt one of the three aforementioned explanations.

'A must-read ... satisfying, rich ... loaded with flavour'
Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that

makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. *In Defense of Food* is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and

architecture. His most recent book, about the ethics and ecology of eating, is *The Omnivore's Dilemma*, named one of the ten best books of 2006 by the *New York Times* and the *Washington Post*. He is also the author of *The Botany of Desire*, *A Place of My Own* and *Second Nature*.

In Defense of Food
Cambridge University Press

#1 *New York Times* Bestseller from the author of *This is Your Mind on Plants*, *How to Change Your Mind*, *The Omnivore's Dilemma*, and *Food Rules*. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and

common sense by confusion--most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With In Defense of Food, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to

eating.

Eddie only has forty-eight hours to defend Volchek in an impossible murder trial - and win - if he wants to save his daughter. Under the scrutiny of the media and the FBI, Eddie must use his razor-sharp wit and every con-artist trick in the book to defend his 'client' and ensure Amy's safety. Four Addresses on the Christian Revelation
Palala Press

"Though threats to American security have changed dramatically in the last decade, U.S. defense policy and military forces look a lot like they did during the closing days of the Cold War - only smaller. Are the policies and the forces about right to deal with a wide range of threats and uncertainties from resurgent big powers to civil/ethnic wars to Persian Gulf-like wars to terrorism and weapons of mass destruction - or should they be redesigned before it's too late? That question drives this book." "Council on Foreign Relations staff, joined by a wide range of other experts, offer four choices: First, meet present threats seriously, that is, by building up forces with a 10 percent spending

increase; second, anticipate breakthroughs in military technology by possible future adversaries and concentrate now on U.S. technological superiority at about present spending levels; third, focus more on low-level but serious threats from terrorists and civil/ethnic wars and answer with greater reliance on our allies and international organizations, like NATO or the United Nations, and cut expenditures by 15 to 20 percent; or fourth, maintain present capabilities and hold spending at about \$250 billion yearly." "The book presents these choices as "Presidential" speeches, so that they can be read and

understood by interested Americans."-

For all its astonishing complexity, however, the immune system can be easily compromised by fatigue, stress, toxins, advanced age, and poor nutrition—hallmarks of modern life—and even by excessive hygiene. Paradoxically, it is a fragile wonder weapon that can turn on our own bodies with startling results, leading today to epidemic levels of autoimmune disorders. *An Elegant Defense* effortlessly guides readers on a scientific detective tale winding from the Black Plague to twentieth-century breakthroughs in vaccination and antibiotics, to today's laboratories that are revolutionizing immunology—perhaps

the most extraordinary and consequential medical story of our time. Drawing on extensive new interviews with dozens of world-renowned scientists, Richtel has produced a landmark book, equally an investigation into the deepest riddles of survival and a profoundly human tale that is movingly brought to life through the eyes of his four main characters, each of whom illuminates an essential facet of our “elegant defense.” *In Defence of the Four Imams* Penguin UK Everything you need for AQA A-level Economics rewritten and restructured into one book from Ray Powell and James Powell for A-level teaching and learning, revised and up-to-date

A Defence of the Trinitatian System, in Twenty-four Sermons
Conventional wisdom suggests that the Platonist philosophers of Late Antiquity, from Plotinus (third century) to the sixth-century schools in Athens and

Alexandria, neglected the political dimension of their Platonic heritage in their concentration on an otherworldly life. Dominic O'Meara presents a revelatory reappraisal of these thinkers, arguing that their otherworldliness involved rather than excluded political ideas, and he proposes for the first time a reconstruction of their political philosophy, their conception of the function, structure, and contents of political science, and its relation to political virtue and to the divinization of soul and state. Among the topics discussed by O'Meara are: philosopher-kings

and queens; political goals and levels of reform: law, constitutions, justice, and penology; the political function of religion; and the limits of political science and action. He also explores various reactions to these political ideas in the works of Christian and Islamic writers, in particular Eusebius, Augustine, Pseudo-Dionysius, and al-Farabi. Filling a major gap in our understanding, *Platonopolis* will be of substantial interest to scholars and students of ancient philosophy, classicists, and historians of political thought.
