AN INSTANT NEW YORK TIMES BESTSELLER • A REESE'S BOOK CLUB PICK Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new

way... It started with the Sh*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-

to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Pocket Anesthesia House of Stratus

This second edition of the bestselling Learning XML provides web developers with a concise but grounded understanding of XML (the Extensible Markup Language) and its potential-- not just a whirlwind tour of XML. The author explains the important and relevant XML technologies and their capabilities clearly and succinctly with plenty of real-life projects and useful examples. He outlines the elements of markup--demystifying concepts such as attributes, entities, and namespaces--and provides enough depth and examples to get started. Learning XML is a reliable source for anyone who needs to know XML, but doesn't want to waste time wading through hundreds of web sites or 800 pages of bloated text. For writers producing XML documents, this book clarifies files and the process of creating them with the appropriate structure and format. Designers will learn what parts of XML are most helpful to their team and will get started on creating Document Type Definitions. For programmers, the book makes syntax and structures clear. Learning XML also discusses the stylesheets needed for viewing documents in the next

generation of browsers, databases, and other devices. Learning XML illustrates the core XML concepts and language syntax, in addition to important related tools such as the CSS and XSL styling languages and the XLink and XPointer specifications for creating rich link structures. It includes information about three schema languages for validation: W3C Schema, Schematron, and RELAX-NG, which are gaining widespread support from people who need to validate documents but aren't satisfied with DTDs. Also new in this edition is a chapter on XSL-FO, a powerful formatting language for XML. If you need to wade through the acronym soup of XML and start to really use this powerful tool, Learning XML, will give you the roadmap you need.

My Alphabet Kit Handbook Hay House, Inc

This book contains the best papers of the First International Joint Conference on Biomedical Engineering Systems and Technologies (BIOSTEC 2008), organized by the Institute for Systems and Technologies of Information Control and Communication (INSTICC), technically co-sponsored by the IEEE Engineering in Medicine and Biology Society (EMBS), ACM SIGART and the Workflow Management Coalition (WfMC), in cooperation with AAAI. The purpose of the International Joint Conference on Biomedical Engineering Systems and Technologies is to bring together researchers and practitioners, including engineers, biologists, health professionals and informatics/computer scientists, interested in both theoretical advances and applications of information systems, artificial intelligence, signal processing, electronics and other engineering tools in knowledge areas related to biology and medicine. BIOSTEC is composed of three co-located conferences; each specializes in one of the

aforementioned main knowledge areas, namely: • BIODEVICES (International Conference on Biomedical Electronics and - vices) focuses on aspects related to electronics and mechanical engineering, - pecially equipment and materials inspired from biological systems and/or - dressing biological requirements. Monitoring devices, instrumentation sensors and systems, biorobotics, micro-nanotechnologies and biomaterials are some of the technologies addressed at this conference.

Beginning HTML5 and CSS3 Rothman Consulting Group, Inc. Come for a visit in Bear Country with this classic First Time Book® from Stan and Jan Berenstain. Join Mama, Papa, Brother, and Sister, as they head to Doctor Grizzly's office for their important check-ups where they will have their temperatures taken, their eyes examined, and their ears looked in. This beloved story is the perfect way to introduce children to what happens when they go to the doctor.

Introduction to Computational Health Informatics "O'Reilly Media, Inc."

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then,

the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

Fixing Access Annoyances "O'Reilly Media, Inc."

Got a teddy bear with a tummy ache or a stuffed dinosaur with scraped knees? Never fear! This delightful activity-kit-in-a-book includes everything kids ages 3 to 8 need to set up an amazing vet clinic and enjoy hours of fun playing doctor. There are pop-out signs to mount in the waiting room; adorably illustrated prescription forms, exam checklists, and appointment reminders to fill out; a nurse's cap to punch out and assemble; four sheets of colorful stickers; and more! The book also offers 15 simple and fun DIY projects to make with common household items, including a thermometer made from a pencil, a lab coat made from an old t-shirt, and a hospital bed made from a cardboard box.

Physicians & Computers Springer Science & Business Media

The world's most popular spreadsheet program is now more powerful than ever, but it's also more complex. That's where this Missing Manual comes in. With crystal-clear explanations and hands-on examples, Excel 2013: The Missing Manual shows you how to master Excel so you can easily track, analyze, and chart your data. You'll be using new features like PowerPivot and Flash Fill in no time. The important stuff you need to know: Go from novice to ace. Learn how to analyze your data, from writing your first formula to charting your results. Illustrate trends. Discover the clearest way to present your data using Excel's new Quick Analysis feature. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

Lycos Personal Web Page Guide Penguin UK

As a girl coming of age during the era of civil rights, Patricia Bath made it her mission to become a doctor. When obstacles like racism, poverty, and sexism threatened this goal, she persevered--brightening the world with a game-changing treatment for blindness. Illustrations.x 10.

Backpacker Elsevier

This book will demystify Angular as a framework, as well as provide clear instructions and examples on how to get started with writing scalable Angular applications. Angular: Up & Running covers most of the major pieces of Angular, but in a structured manner that is generally used in hands-on training. Each chapter takes one concept, and use examples to cover how it works. Problems to work on (with solutions) at the end of each chapter reinforce the learnings of each chapter and allow readers to really get hands-on with Angular.

Teddy Bear Doctor: A Let's Make & Play Book Penguin

A guide to writing a full-length transformational nonfiction book, from an editor with two decades' experience working in publishing. "I know I have a book in me." "I've always wanted to be an author." "People always ask me when I'm going to write my book." "I have a story to tell, but I never seem to make time to write." Are you a thought leader, healer, or change-agent stuck at the starting line of book publication? Life coach and publishing industry insider Kelly Notaras offers a clear, step-by-step path for turning your transformational idea or story into a finished book as quickly as possible. With humor, encouragement, and common sense, she demystifies the publishing process so you can get started, keep writing, and successfully get your wisdom out into the world. Notaras guides you through: Getting clear on your motivation for writing a book, Crafting a powerful, compelling hook and strong internal book structure, Overcoming resistance and writer's block, and Getting your finished manuscript onto the printed page, whether through traditional publishing or self-publishing. Publishing a book has never been as simple, accessible, and affordable as it is today, and in our tumultuous

world, readers need your healing voice. Be brave, be bold, and take the steps you need to share your message with those who need to hear it most.

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition

Storey Publishing

'I am a woman's rights. I have plowed and reaped and husked and chopped and mowed, and can any man do more than that? I am as strong as any man that is now' A former slave and one of the most powerful orators of her time, Sojourner Truth fought for the equal rights of Black women throughout her life. This selection of her impassioned speeches is accompanied by the words of other inspiring African-American female campaigners from the nineteenth century. One of twenty new books in the bestselling Penguin Great Ideas series. This new selection showcases a diverse list of thinkers who have helped shape our world today, from anarchists to stoics, feminists to prophets, satirists to Zen Buddhists.

Doctor Who: The Official Cookbook SOPs Press

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

The New Writing Environment Lippincott Williams & Wilkins

Richard Gordon's acceptance into St Swithan's came as no surprise. However, it was a shock to discover that, once there, he would have to work. Fortunately, life proved not to be all work and no play. This hilarious hospital comedy is for anyone who wonders what medical students get up to. Just don't read it on the way to the doctor's!

The Berenstain Bears Go to the Doctor "O'Reilly Media, Inc."

Designed for easy transport and quick reference, Pocket Anesthesia, presents essential information that residents, anesthesiologists, CRNAs, and medical students need on the wards and in the operating room. Edited by anesthesia faculty at Harvard Medical School, this pocket-size reference is ideally suited for today's fast-paced anesthesia environment--it is concise, easy to read, and evidence-based. Essential information is presented in a well-organized schematic outline format with many tables, algorithms, and diagrams. The book is filled with must-know facts about drugs, frequent intraoperative problems, differential diagnosis, common disease states, patient evaluation, and anesthetic considerations for each subspecialty. New to the revised, second edition, is the inclusion of ultrasound-guided regional anesthesia procedures.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing,

implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Data Mining: Concepts and Techniques Wisconsin Historical Society

A comprehensive teacher resource book that provides vital strategies for teaching early sounds._

Using Intranet HTML Lippincott Williams & Wilkins

HTML (Hypertext Markup Language) is the language that all of the World Wide Web is based on. As the Web moves into the corporate world of Intranets, developers will want to see how to apply HTML to their situation. This special complete reference features a CD-ROM with all the tools you need to build an Intranet with HTML.

Learning XML Wiley Publishing

Pioneering North Woods doctor Kate Pelham Newcomb comes to life in this addition to the Badger Biographies series for young

readers. Born in 1885, Kate Pelham was suppose to grow up to be a proper young lady in Boston, but despite her father's wishes she was determined to be a doctor. After medical school, her husband's health brought them to the clean air of northern Wisconsin and before long Kate knew every back road and cabin in the North Woods. She visited patients by snowmobile, by canoe, and by snowshoe and never sent a bill. Instead she was paid in firewood and vegetables. But what Kate dreamed of more than anything for her patients was a hospital. And that's when the kids of the community got involved. They set out to collect a million pennies - \$10,000 - to help Dr. Kate build a hospital. As the news spread, coins poured in from countries across the globe. Students carted bushels of pennies, and Dr. Kate read thousands of letters cheering on her effort. Her dream came true in 1954 when the Lakeland Memorial Hospital opened its doors. Young readers will warm to Kate's spirit of compassion and never-say-never attitude.
