Soon to be a show on Hulu! Rights to develop Wild Cards for TV have been acquired by Universal Cable Productions, the team that brought you The Magicians and Mr. Robot, with the co-editor of Wild Cards, Melinda Snodgrass as executive producer. Let the secret history of the world be told-of the alien virus that struck Earth after World War II, and of the handful of the survivors who found they now possessed superhuman powers. Some were called Aces, endowed with powerful mental and physical prowess. The others were Jokers, tormented by bizarre mind or body disfigurements. Some served humanity. Others caused terror. And now, forty years later, as a gang war between the Shadow Fists and the mafia rages out of control in the streets of Jokertown, Aces and Jokers go underground-to wage their own war against the powers of the netherworld. Here, in the fifth volume of the exciting series, ten of science fiction's most gifted writers take readers on a journey of wonder and excitement in an astounding alternate history. Featuring the talents of John J. Miller, Roger Zelazny, Leanne C. Harper, Arthur Byron Cover, Melina C. Snodgrass, Edward Bryant, Stephen Leigh, Pat Cadigan, Walter Jon Williams, and George R. R. Normal 0 false false false By connecting applications, modeling, and visualization, Gary Rockswold motivates students to learn mathematics in the context of their experiences. In order to both learn and retain the material, students must see a connection between the concepts and their real lives. In this new edition, connections are taken to a new level with "See the Concept" features, where students make important connections through detailed visualizations that deepen understanding. Rockswold is also known for presenting the concept of a function as a unifying theme, with an emphasis on the rule of four (verbal, graphical, numerical, and symbolic representations). A flexible approach allows instructors to strike their own balance of skills, rule of four, applications, modeling, and technology.

Lights! Camera! Action! Arthur Bean is ready to have the best year any eighth grader has ever had. The awesome zombie movie he's writing with BFF Robbie Zack is definitely going to be a blockbuster. He even has a girlfriend. Yes, that's right, a GIRLFRIEND! With everything lined up so nicely, he's sure his teachers will start to appreciate his true genius this year. Except for the little problem of the movie camera Arthur and Robbie "borrowed" to film their upcoming blockbuster movie. And then Arthur's girlfriend gets jealous of his friendship with Kennedy. And there's the actual co-writing,

producing, and directing of their film...Drama is definitely on the menu for this year. Arthur would just prefer it stay confined to his script. In 2001, scientists were finally able to determine the full human genome sequence, and with the discovery began a genomic voyage back in time. Since then, we have sequenced the full genomes of a number of mankind's primate relatives at a remarkable rate. The genomes of the common chimpanzee (2005) and bonobo (2012), orangutan (2011), gorilla (2012), and macaque monkey (2007) have already been identified, and the determination of other primate genomes is well underway. Researchers are beginning to unravel our full genomic history, comparing it with closely related species to answer age-old questions about how and when we evolved. For the first time, we are finding our own ancestors in our genome and are thereby gleaning new information about our evolutionary past. In *Ancestors in Our Genome*, molecular anthropologist Eugene E. Harris presents us with a complete and up-to-date account of the evolution of the human genome and our species. Written from the perspective of population genetics, and in simple terms, the book traces human origins back to their source among our earliest human ancestors, and explains many of the most intriguing questions that genome scientists are currently working to answer. For example, what does the high level of discordance among the gene trees of humans and the African great apes tell us about our respective separations from our common ancestor? Was our separation from the apes fast or slow, and when and why did it occur? Where, when, and how did our modern species evolve? How do we search across genomes to find the genomic underpinnings of our large and complex brains and language abilities? How can we find the genomic bases for life at high altitudes, for lactose tolerance, resistance to disease, and for our different skin pigmentations? How and when did we interbreed with Neandertals and the recently discovered ancient Denisovans of Asia? Harris draws upon extensive experience researching primate evolution in order to deliver a lively and thorough history of human evolution. *Ancestors in Our Genome* is the most complete discussion of our current understanding of the human genome available.

Life is about all the pieces coming together...if they fit.Cassidy knows the ugly side of love all too well, and isn't interested in allowing it into her own life. So, why does the man at the gym make her question that?Lucas is too busy raising his young daughter to look for love, but life has already shown him just how quickly things can change. Maybe that's why the woman doing sit-ups has him doing a doubletake.When the pieces of two people fit, falling in love should be easy. Except there's always something in the way of happily ever after.And just because two people fit, doesn't always mean they match.This is a standalone romance.

He fought for king and country, but that battle was nothing compared to the one he'll wage for a woman's heart. Still reeling from the news of her father's death during the Norman Conquest, Isabel Dumont is unprepared when trouble arrives at the castle gates. Alexandre d'Évreux, a Norman knight with close ties to England's new king, has arrived to secure the land and the loyalties of the Dumont family. Desperate to protect her people, Isabel strives to keep the confounding knight at arm's length and hide the truth about her father's death. For Alexandre, the spoils of war come with more than just a generous gift of land. They come with Isabel Dumont. Vowing to marry only for love, Alexandre finds himself in a difficult situation as a conqueror granted dominion over the land and its people. Isabel is the one person capable of helping him win the regard of those living in the war-torn country. . . if he chooses to accept her. Just when Alexandre finds a spark of hope that he and Isabel have a chance at love, she vanishes. His quest to find her plunges him deeper into the conquest's fallout. Was she taken? Or did she leave? CONTENT WARNING: Entering into this novel may cause extreme affection toward knights of old, admiration for strong-willed women, and the overwhelming belief that love really can conquer all. 88,943 Words

This book takes a new look at the history of individual rights, focusing on how philosophers have written that history. Eleanor Curran argues that the turn to jurisprudence, after the philosophical rejection of natural rights, has resulted in an impoverished notion of rights as no more than claims and entitlements.
