'Bruno, get in  
the bath!' It's  
bathtime, but  
there's a  
whale in the

tub and Bruno  
can't get in!  
No one in his  
family  
believes him  
and Bruno  
keeps being  
sent back to  
the bathroom  
until, at last,  
Bruno and the  
whale work  
out a very  
splashy

solution. A  
wonderful  
story that  
humorously  
explores  
bathtime and  
a playful  
celebration of  
a child's  
imagination.

Whale*  
Chronicle  
Books

This gorgeously illustrated picture book is a celebration of summer vacation and West Coast island life. Every day is different on Gran's island in the Salish Sea as granddaughter climbs big-leaf maples, eats blackberries, explores tide pools and sandstone caves and examines ancient middens and petroglyphs. She and Gran watch harbor seals sunning themselves and Gran's

neighbor carving an eagle out of a piece of cedar while drinking fresh nettle tea. And on her way home, our young narrator sees a pod of orcas, breaching, tail lobbing and spy-hopping as she says goodbye to the island for another summer.

Going to the Fair is a picture book celebration of the simple pleasures of a visit to the annual fall fair of a rural community. Recommended reading ages 4-8  
*The Lost Narwhal* Paw Prints  
Discover the wonder of trees—one of

the most essential life forms on the planet—in this beautifully illustrated, entertaining, and educational guide from the acclaimed author of *What We See in the Stars*. Trees are fascinating: The oldest living organism on Earth is a tree, and forest biomes cover one-third of the Earth's surface. Trees provide fruit, spices, nuts, timber, shade, habitats, and oxygen, as well as absorbing

carbon dioxide from the atmosphere. They can tap into fungal networks in the soil to care for each other by trading water and nutrients and to warn one another of drought and disease. In *Trees: An Illustrated Celebration*, celebrated artist and author Kelsey Oseid shows us just how vital trees are to the health and beauty of our planet. Her striking naturalistic art is accompanied by fun

scientific facts: Some trees have thinner root hairs than human hairs; tree rings provide important information on supernovae and climate change; and you can identify many trees from their leaf shape alone. The world's most stunning, strange, and noteworthy trees—from mangroves and redwoods to baobabs and dragon trees—come to life in Oseid's elegant and

playful style. Filled with captivating information and vivid, colorful illustrations, *Trees: An Illustrated Celebration* will delight and inspire nature lovers of all ages. *National Geographic Readers: Whales (Pre-Reader)* Allen & Unwin Somewhere in his travels, Mel the narwhal has made a wrong turn and ended up thousands of miles from home! Luckily, he's adopted by a pod of

beluga whales who treat Mel as if he were one of their own. Inspired by actual events, *The Lost Narwhal* is a story about embracing your uniqueness and learning what it means to feel accepted. **Green Shadows, White Whale** Greystone Books Ltd "Reflects great admiration and wonder for all humpback whales ... A true homage to these wondrous

creatures." —Kirkus (STARRED Review) This evocative picture book celebrates a child's connection and kinship with whales. Swimming, singing, and blowing bubbles—children and baby whales love many of the same things! This lyrical picture book shows us how whales' underwater lives are touchingly like our own. Patterned in a call-and-response format, *Show Us Where You*

Live, Humpback begs to be read aloud at bedtime, and includes: Wondrous facts about humpback whales A celebration of our connection with the natural world Beautiful and captivating illustrations At the story's end, acclaimed author Beryl Young and debut illustrator Sakika Kikuchi leave readers gently falling asleep, dreaming of the wonderful world we

share with whales. *The Blue Whale* Ten Speed Press What We See in the Stars Kelsey Oseid is a richly illustrated guide to the myths, histories, and science of the celestial bodies of our solar system, with stories and information about constellations, planets, comets, the northern lights, and more. Combining art, mythology, and science, *What We See in the Stars* is

a tour of the night sky through more than a hundred magical pieces of original art, all accompanied by text that weaves related legends and lore with scientific facts. This beautifully packaged book covers the night sky's most brilliant features such as constellations, the moon, the bright stars, and the visible planets, as well as less familiar celestial phenomena

like the outer planets, nebulae, and deep space. Adults seeking to recapture the magic of youthful stargazing, younger readers interested in learning about natural history and outer space, and those who appreciate beautiful, hand-painted art will all delight in this charming book.

All about Whales Nature Storybooks This is a new, redesigned and reformatted edition of a

popular title. Whales and dolphins, or cetaceans, have captivated and intrigued humankind for centuries. They are incredibly diverse and have evolved a fascinating range of specializations to allow them, despite being air-breathing mammals, to exploit habitats ranging from the surface waters to the abyssal depths. Whales and Dolphins of the World is a stunningly illustrated

celebration of their variety - there are over 80 species - behaviour and natural history. It describes what we know of their lives such as feeding, reproduction, communication and social structures, and outlines the factors that affect them, from hunting to pollution. The strong relationship between humans and cetaceans is also considered, with a look at dolphin therapy, as

are the pros and cons of whale- and dolphin-watching and what makes a good trip. A map of the world highlights the waters in which these mammals are found. Nests, Eggs, Birds Little Gestalten From the author of the #1 New York Times bestseller *She Persisted* comes a beautiful book about the animals who share our planet--and what we can do to help them survive.

Did you know that blue whales are the largest animals in the world? Or that sea otters wash their paws after every meal? The world is filled with millions of animal species, and all of them are unique and special. Many are on the path to extinction. In this book, Chelsea Clinton introduces young readers to a selection of endangered animals, sharing what makes them special, and

also what threatens them. Taking readers through the course of a day, *Don't Let Them Disappear* talks about rhinos, tigers, whales, pandas and more, and provides helpful tips on what we all can do to help prevent these animals from disappearing from our world entirely. With warm and engaging art by Gianna Marino, this book is the perfect read for animal-lovers and anyone who

cares about our planet. Praise for Don't Let Them Disappear: "A winning heads up for younger readers just becoming aware of the wider natural world." -- Kirkus Reviews "An inviting . . . appeal to care for the planet and its most vulnerable creatures." -- Publishers Weekly

Packed with awe-inspiring

images of hundreds of species from some of the world's top wildlife photographers . *Secrets of the Whales* Eerdmans Books For Young Readers In this beautiful story of kindness and empathy, loneliness and love, one creature finds that the help he needs is just a song and a sigh away. Whale's beautiful song winds its way through the ocean, reaching the farthest of

faraways. His song is one of happiness and hope, magic and wonder--and Whale's fellow sea creatures are calmed, cheered, and lulled by it. But though Whale sings his tender song day after day, night after night, Whale wonders why he has no song to fill his empty heart. So when he lets out a mournful sigh, the ocean carries it like a wish through its fathoms, bringing it to just the right place. Filled

with stunning art and poetic language, this poignant story reminds us that being kind and helping a friend in need is sometimes the most beautiful thing of all.
