Designing and Conducting Health Surveys is written for students, teachers, researchers, and anyone who conducts health surveys. This third edition of the standard reference in the field draws heavily on the most recent methodological research on survey design and the rich storehouse of insights and implications provided by cognitive research on question and questionnaire design in particular. This important resource presents a total survey error framework that is a useful compass for charting the dangerous waters between systematic and random errors that inevitably accompany the survey design enterprise. In addition, three new studies based on national, international, and state and local surveys—the UNICEF Multiple Indicator Cluster Surveys, California Health Interview Survey, and National Dental Malpractice Survey—are detailed that illustrate the range of design alternatives available at each stage of developing a survey and provide a sound basis for choosing among them.

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

A Dangerous Legacy (An Empire State Novel Book #1) Crown/Archetype

To Have and to Hold (1899) is a novel by American author Mary Johnston. It was the bestselling novel in the United States in the following year (1900). To Have and to Hold is the story of an English soldier, Ralph Percy, turned Virginian explorer iIPn colonial Jamestown. Ralph buys a wife for himself - a girl named Jocelyn Leigh - little knowing that she is the escaping ward of King James I, fleeing a forced marriage to Lord Carnal. Jocelyn hardly loves Ralph - indeed, she seems to abhor him. Carnal, Jocelyn's husband-to-be, eventually comes to Jamestown, unaware that Ralph Percy and Jocelyn Leigh are man and wife. Lord Carnal attempts to kidnap Jocelyn several times and eventually follows Ralph, Jocelyn, and their two companions - Jeremy Sparrow, the Separatist minister, and Diccon, Ralph's servant - as they escape from the King's orders to arrest Ralph and carry Jocelyn back to England. The boat they are in, however, crashes on a desert island, but they are accosted by pirates, who, after a short struggle, agree to take Ralph as their captain, after he pretends to be the pirate "Kirby". The pirates gleefully play on with Ralph's masquerade, until he refuses to allow them to rape and pillage those aboard Spanish ships. The play is up when the pirates see an English ship off the coast of Florida. Ralph refuses to fire upon it, knowing it carries the new Virginian governor, Sir Francis Wyatt, but the pirates open fire, and Jeremy Sparrow, before the English ship can be destroyed, purposefully crashes the ship into a reef. The pirates are all killed, but the Englishmen (and woman) are rescued by the Governor's ship. *From This Moment* John Wiley & Sons
