Mafioso Jack Rudy silenced military intelligence operative Lee Harvey Oswald to avoid a trial that would implicate LBJ as the mastermind of the JFK assassination. In 1979, Congress determined that there was a conspiracy regarding snipers from both the Texas School Book Depository and the Grassy Knoll at Dealey Plaza, Dallas, Texas. The proof of LBJ's having foreknowledge of sniper nests awaiting is his ducking to the floor of the vice presidential limousine thirty seconds before the JFK motorcade entered the Dealey Plaza.

Only a redacted version of this LBJ photo was submitted to the Warren Commission record to hide LBJ's foreknowledge of the JFK murder.

The definitive account of the most notorious street gang in America—the MS-13—as seen through the lives of gang members and their families caught in its malicious web The MS-13 was born from war. In the 1980s, El Salvador was enmeshed in a bloody civil conflict. To

escape the guerrilla assaults and death squads, many fled to the US and settled in Los Angeles. Among them were Alex and his brother. There, as a survival instinct, Alex and a small number of Salvadoran immigrants formed a group called the Mara Salvatrucha Stoners, a relatively harmless social network bound by heavy metal music and their Salvadoran identity. But later, as they brushed against established local gangs, the group took on a harder edge, selling drugs, stealing cars and killing rivals who threatened their territories. As authorities cracked down, gang members like Alex were incarcerated and deported. But in the prison system, the group only grew stronger, and in Central America, the gang multiplied, eventually spreading to a half-dozen nations in two continents. Today, MS-13 is one of the most infamous street gangs on earth, with an estimated ten thousand members operating in dozens of states and linked to thousands of grisly murders each year in the US and abroad. But it is also misunderstood—less a drug cartel and more a hand-to-mouth organization whose criminal economy is based mostly on small-time extortion schemes and petty drug dealing. Journalist and longtime organized crime investigator Steven Dudley brings readers inside the nefarious group to tell a larger story of how a flawed US and Central American policy, and the exploitative and unequal economic systems helped foster the gang and sustain it. Ultimately, MS-13 is the story of the modern immigrant and the perennial battle to escape a vortex of poverty and crime, as well as the repressive, unequal systems that feed these problems.

Here James Mittelman explains the systemic dynamics and myriad consequences of globalization, focusing on the interplay between globalizing market forces, in some instances guided by the state, and the needs of society. Mittelman finds that globalization is hardly a unified phenomenon but rather a syndrome of processes and activities: a set of ideas and a policy framework. More specifically, globalization is propelled by a changing division of labor and power, manifested in a new regionalism, and challenged by fledgling resistance movements. The author argues that a more complete

understanding of globalization requires an appreciation of its cultural dimensions. From this perspective, he considers the voices of those affected by this trend, including those who resist it and particularly those who are hurt by it. The Globalization Syndrome is among the first books to present a holistic and multilevel analysis of globalization, connecting the economic to the political and cultural, joining agents and multiple structures, and interrelating different local, regional, and global arenas. Mittelman's findings are drawn mainly from the non-Western worlds. He provides a cross-regional analysis of Eastern Asia, an epicenter of globalization, and Southern Africa, a key node in the most marginalized continent. The evidence shows that while offering many benefits to some, globalization has become an uneasy correlation of deep tensions, giving rise to a range of alternative scenarios.

This book is about how Australians have responded to stories about suffering and injustice in Australia, presented in a range of public media, including literature, history, films, and television. Those who have responded are both ordinary and prominent Australians—politicians, writers, and scholars. All have sought to come to terms with Australia's history by

responding empathetically to stories of its marginalized citizens. Drawing upon international scholarship on collective memory, public history, testimony, and witnessing, this book represents a cultural history of contemporary Australia. It examines the forms of witnessing that dominated Australian public culture at the turn of the millennium. Since the late 1980s, witnessing has developed in Australia in response to the increasingly audible voices of indigenous peoples, migrants, and more recently, asylum seekers. As these voices became public, they posed a challenge not only to scholars and politicians, but also, most importantly, to ordinary citizens. When former Prime Minister Kevin Rudd delivered his historic apology to Australia's indigenous peoples in February 2008, he performed an act of collective witnessing that affirmed the testimony and experiences of Aboriginal Australians. The phenomenon of witnessing became crucial, not only to the recognition and reparation of past injustices, but to efforts to create a more cosmopolitan Australia in the present. This is a vital addition to Transaction's critically acclaimed Memory and Narrative series. Trial of Lee Harvey Oswald Kings Road Publishing
