This book features Louis Agassiz's seminal lecture course

in which the Swiss-American scientist, a self-styled "American Humboldt," summarized the state of zoological knowledge in his time. Though Darwin's theory of evolution would soon dismantle his idealist science, Agassiz's lectures are nonetheless modern in their insistence on the social and cultural importance of the scientific enterprise. An extensive,

well-illustrated introduction by Agassiz's biographer, Christoph Irmscher, situates Agassiz's lectures in the context of his life and nineteenth-century science, while also confronting the deeply problematic aspects of his legacy. Profusely annotated, this edition offers fascinating insights into the history of science and appeals to anyone with an interest in zoology and

natural history. "Christoph Irmscher provides a scholarly and insightful analysis of the intentions and beliefs of Louis Agassiz, a larger-than-life scientist of the mid-19th century and fierce opponent of Charles Darwin. One of the foremost naturalists of his time, Agassiz's encyclopedic knowledge and brash confidence sustained bold and often controversial theories,

which contributed to extreme intellectual ferment at the dawn of contemporary evolutionary biology.” James Hanken, Alexander Agassiz Professor of Zoology, Harvard University, USA
Introduction à L'Histoire de la Litterature Anglaise Peter Lang
 The most influential work on Buddhism to be published in the nineteenth century, Introduction à

l'histoire du Buddhisme indien, by the great French scholar of Sanskrit Eugène Burnouf, set the course for the academic study of Buddhism—an d Indian Buddhism in particular—for the next hundred years. First published in 1844, the masterwork was read by some of the most important thinkers of the time, including Schopenhauer and Nietzsche in Germany and Emerson

and Thoreau in America. Katia Buffetrille and Donald S. Lopez Jr.'s expert English translation, Introduction to the History of Indian Buddhism, provides a clear view of how the religion was understood in the early decades of the nineteenth century. Burnouf was an impeccable scholar, and his vision, especially of the Buddha, continues to profoundly shape our modern understanding

of Buddhism. In reintroducing Burnouf to a new generation of Buddhologists, Buffetrille and Lopez have revived a seminal text in the history of Orientalism. <i>Introduction à l'histoire du buddhisme indien</i> University of Chicago Press Afin de garantir la bonne marche de l'entreprise, l'employeur possède un pouvoir de direction qui lui permet de prendre des décisions en matière de	gestion de l'entreprise, mais également en matière de gestion du personnel. Aussi dispose- t-il du pouvoir disciplinaire l'autorisant à sanctionner le salarié pour son comportement fautif. Par quels moyens l'employeur peut-il surveiller ses salariés et contrôler la bonne exécution de leur travail ? Quels sont les éléments constitutifs de la faute ? Quelles sanctions prononcer	pour quelles fautes ? Quelles sont les différentes procédures disciplinaires possibles ? Cet ouvrage concis mais exhaustif dresse un panorama extrêmement clair du contenu et des limites du pouvoir disciplinaire de l'employeur. L'auteur propose des réponses argumentées à toutes les questions que se posent les dirigeants, DRH, juristes d'entreprises et avocats. De nombreux

conseils et modèles de documents leur permettront d'échapper aux pièges de la procédure disciplinaire ou, mieux, de les prévenir.

Pourquoi certains pays sont-ils riches et d'autres pauvres ?

Dans cette introduction qui se veut un petit manuel d'histoire économique à l'échelle mondiale, Robert C. Allen explore les interactions qui existent entre la géographie, la mondialisation , l'évolution technologique, la politique économique et les institutions pour montrer comment se sont formées la richesse et la pauvreté des nations. À partir d'une analyse des facteurs de croissance

fondée sur l'examen d'un grand nombre d'exemples tirés de l'histoire, il nous révèle les causes des inégalités du monde dans lequel nous vivons aujourd'hui.

Accessible, illustré par de nombreux tableaux et graphiques, cet ouvrage éclaire des événements mal connus, des histoires inexplorées, pour offrir une nouvelle compréhension de l'évolution des échanges à l'échelle planétaire.

S'appuyant sur les travaux les plus récents en histoire économique, il offre une introduction vivante et riche à un champ de recherche en plein développement.

A wealth of historical writing dealing with the Maghrib (Morocco, Algeria, Tunisia, and Libya) has been published during the

roughly forty years since European colonial control ended in the region. This book provides a state of the field survey of this postcolonial Maghribi historiography. The book contains thirteen essays by leading Maghribi and North American scholars. The first section surveys the Maghrib as a whole; the second focuses on individual countries of the Maghrib;

and the third explores theoretical issues and case studies. Cutting across chronological categories, the book encompasses historiographical writing dealing with all eras, from the ancient Maghrib to the contemporary period.

This book contains articles on historic cities of the Islamic world, ranging from West Africa to

Malaysia, which over the centuries have been centres of culture and learning and of economic and commercial life, and which have contributed much to the consolidation of Islam as a faith and as a social and political institution. The articles have been taken from the second edition of the Encyclopaedia of Islam, completed in 2004, but in many cases expanded and rewritten. All have been

updated to include fresh historical information, with note of contemporary social developments and population statistics. The book thus delineates the urban background of Islam as it has evolved up to the present day, highlighting the role of such great cities as Cairo, Istanbul, Baghdad and Delhi in Islamic history, and also brings them together in a rich panorama

illustrating one of mankind's greatest achievements, the living organism of the city. *Introduction à l'histoire générale de la province de Picardie* Paris, A. Colin et cie Through the presentation of Muslim material in administrative literature the author has developed a broader and more coherent picture of the way in which the 'Mirrors for Princes', the manuals on market supervision and on

household fitted into a broader concept of centralised administration in Islamic political economy. This volume provides an enlightening and original synthesis of a great deal of economic literature that is usually treated in a rather fragmentary fashion with no common analytic thread.

The Gods of Egypt, first published in France in 1992 and now in its third French edition, is a short, elegant, and highly accessible survey of ancient Egyptian religion. The clarity and brevity of Claude Traunecker's book make it especially valuable to readers seeking an authoritative introduction to this complex

topic. The Cornell edition, the first English translation, is enhanced by 23 illustrations. Traunecker begins with an overview of the source materials and a discussion of the historiography of Egyptian religion, a subject relatively neglected by scholars. He then describes the actual and metaphysical worlds inhabited by the Egyptian deities and the role that humans played in the

Egyptian universe. Focusing especially on the diversity and number of approaches used by Egyptians to explain their world, The Gods of Egypt offers a succinct and highly readable presentation of recent interpretations of Egyptian religion. [Introduction Aá L'Histoire de la Philosophie](#)
